AGRICULTURE IN TRANSITION***

FARMING'S GOT TALENT!

***VOCATIONAL EDUCATION
AND TRAINING FOR
AGRICULTURE IN TRANSITION***

Innovation in agricultural education

R+D PROJECT

AGRÁRMINISZTERIUM

#FarmingSkills

What the teachers mean by the new methodology...

To give effective and adaptable knowledge and information

To fit in requirements of the continuously developing market

To ensure alternatives in case of lack of educational conditions

To eliminate distances
e.g. Covid - 19

What the students mean by this...

Practical

**Easy to use- both
for the trainers
and the students😊**

**Motivating
surroundings,
education as
an experience**

**Location- and
device-
independent
solution**

Realistic

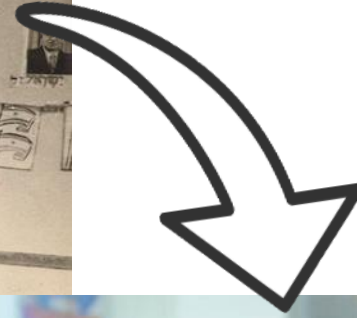

Interactive

Safe

Virtualised practical training

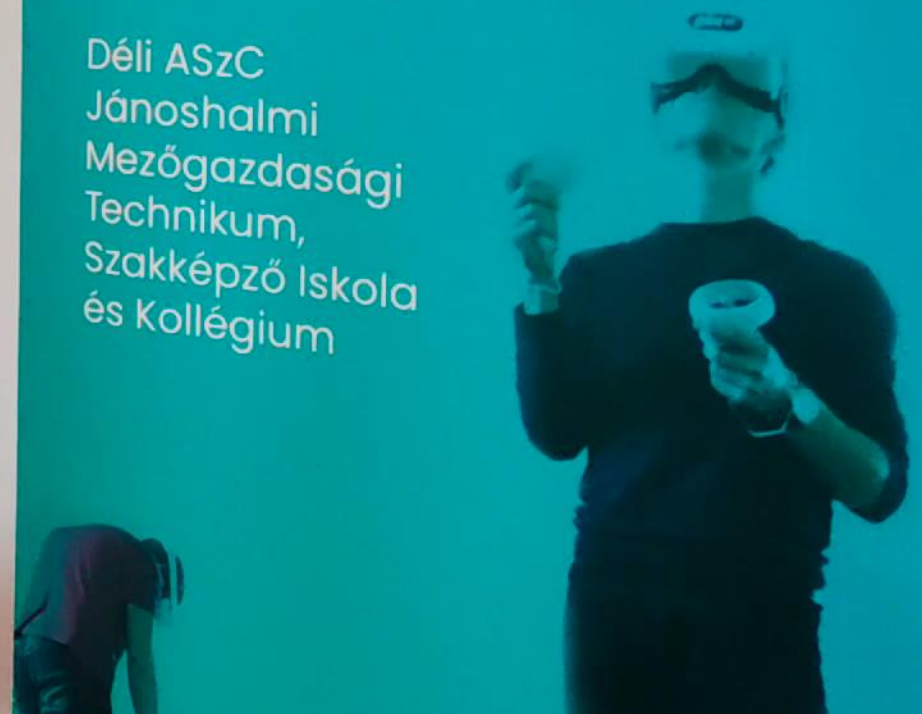

**Tanulj Te is
a Szaki Virtuális tantermében
a Pix VR mezőgazdasági
oktató rendszerével!**

Déli ASzC
Jánoshalmi
Mezőgazdasági
Technikum,
Szakképző Iskola
és Kollégium

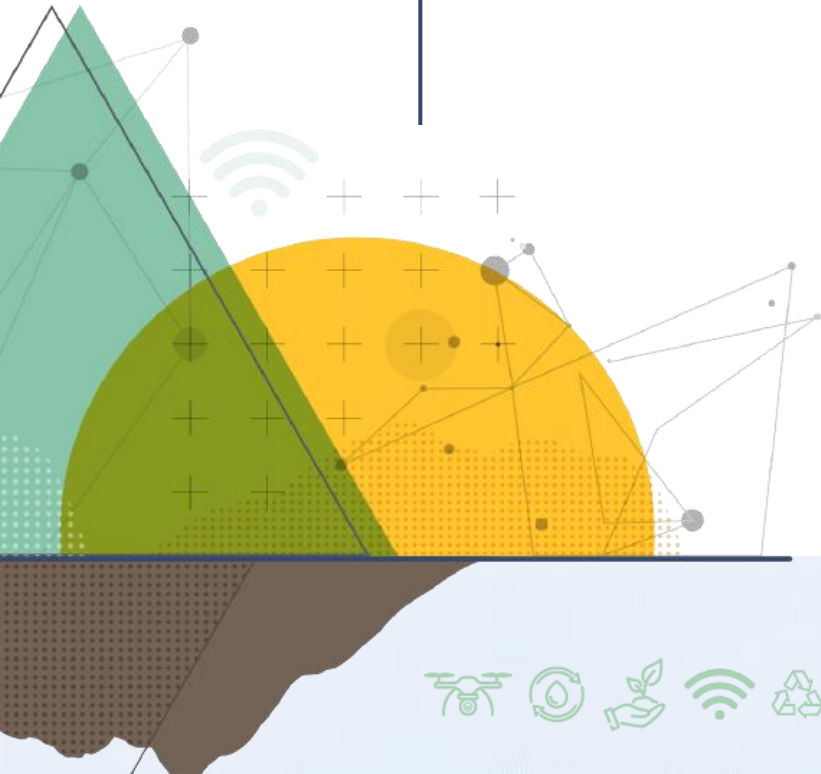

4 pillars

The future: a framework based on the strength of a community.

- Education (with the help of the VR goggles)
- Peer-reviewed program library
- Modelling through cooperation
- Inclusion of producer companies

VR may not mean an innovation for many of you but the way we would like to use it makes it a real innovation in the agricultural education.
