

SHEEP AND GOAT MEAT

ITALY: NATIONAL MARKET SITUATION

Maggio 2019

SHEEP MILK CRISIS

weight on breeding sector

Sardinian pecorino is in crisis, farmers' protests continue for the price of sheep's milk which has dropped to 0.60 cents / l, below the production cost which stands at 0.70 cents per liter. A serious crisis in the entire dairy sheep chain that is putting a strain on the existence of a fundamental production sector for Sardegna (42% livestock).

Domestic consumption decreased, but above **all exports fell (-33%)**, especially those to the reference market in North America, where the drop in exports reached 44%. At the same time there was **an excess of production**: the quantity of pecorino romano that the market was able to absorb is 280 thousand quintals, but the dairy industry produced 340 thousand. The warehouses are now full and the wholesale Pecorino Romano prices have plummeted by 30%. Therefore, **the price of the raw material has collapsed**. A vigorous protest has brought the problem on tv e newspaper everyday for a week, raising consumer awareness.

TRUMP IMPORT DUTY

USA HAS ANNOUNCED ITS INTENTION TO INCREASE IMPORT DUTIES ON GOODS FROM EU MEMBER STATES. STRONG IMPACT ON ALL OVER THE SHEEP SECTOR

On the export front there is an important imbalance. Roman pecorino is destined for 42% in the United States, 39% in Italy and 19% in European Union countries. Italy was in 1st place for the export of Pecorino Romano type to the USA with 70% in value incidence in 2017. The treat of import duty could compromise the sector economy

BREEDING FARMS AND LIVESTOCK

the number of farms is reduced due to abandonment by young people and lack of generational turnover
