

### FARMING'S GOT TALENT!

VOCATIONAL EDUCATION
AND TRAINING FOR
AGRICULTURE IN TRANSITION

### Solutions for the adaptation of extensive livestock farming to climate change

entre tantes

# Extensive Livestock Farming provides ecosistemic services

Resilience

## Training needs according to complexity of multifunctional management

Water - Soil - Pastures Shrubs - Animal
husbandry - Ecology Trees - Market data CAP & regulatory aspects
- environmental limits

**Sector main concerns\*:** water availability, rising temperatures pasture production, reproductive problems and emerging diseases, biodiversity

\* LiveAdapt survey: 86% farmers identify serious impacts of climate change in their region

## Increasing number of highly demanding skills expected from the (often) single manager

+ Challenges +

Generational replacement
Digitalisation
Rural depopulation
Climate change

Professionalisation and lifelong capacity building

### LiveAdapt training:

Transfer of knowledge and specific training aimed at students, professionals and stakeholders related to the extensive livestock farming

Member State responsibility:

the role of AKIS!!

#### 5 courses:

- Extensive farming + climate change
- Resilient and adaptative management
- Tools, instruments and strategies
- Farm advising and assessing
- Planning adaptation + mitigation

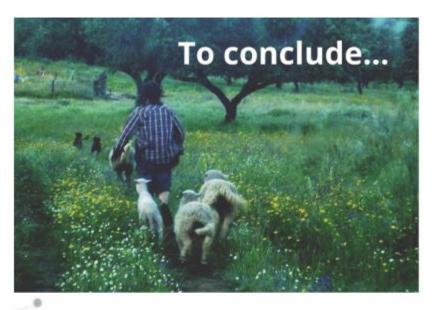

- Need of sector upskill and reskill through a widely accesible + modern system of life long training
- Innovation in mechanisms to secure knowledge-based management, flexible and adaptable to changes
- Extensive livestock vs. industrial/intensive models
- Crossborder approach to ecosistemic services provided by extensive livestock farming
- Targetted support / cross compliance within selected measures for land owners who guarantee a professional profile managing the farm
- Training credit systems + selected CAP or national supports conditioned to training credits

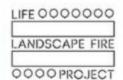

### FARMING'S **GOT TALENT!**

VOCATIONAL EDUCATION AND **TRAINING** FOR AGRICULTURE IN TRANSITION

Environmental engineering services, development of European, national and regional Research + Develpment + Innovation projects

Horizon Europe | Erasmus+ | INTERREG | LIFE
