## Result indicators

07/03/2024 – Version 18.0

Code	Result indicators (only based on interventions supported by the CAP)	
<a href="#">R.1<sup>PR</sup></a>	Enhancing performance through knowledge and innovation	Number of persons benefitting from advice, training, knowledge exchange or participating in European Innovation Partnership (EIP) operational groups supported by the CAP in order to enhance sustainable economic, social, environmental, climate and resource efficiency performance
<a href="#">R.2</a>	Linking advice and knowledge systems	Number of advisors receiving support to be integrated within the Agricultural Knowledge and Innovation Systems (AKIS)
<a href="#">R.3</a>	Digitalising agriculture	Share of farms benefitting from support for digital farming technology through CAP
<a href="#">R.4</a>	Linking income support to standards and good practices	Share of utilised agricultural area (UAA) covered by income support and subject to conditionality
<a href="#">R.5</a>	Risk Management	Share of farms with supported CAP risk management tools
<a href="#">R.6<sup>PR</sup></a>	Redistribution to smaller farms	Percentage of additional direct payments per hectare for eligible farms below average farm size (compared to average)
<a href="#">R.7<sup>PR</sup></a>	Enhancing support for farms in areas with specific needs	Percentage additional support per hectare in areas with higher needs (compared to average)
<a href="#">R.8</a>	Targeting farms in specific sectors	Share of farms benefitting from coupled income support for improving competitiveness, sustainability or quality
<a href="#">R.9<sup>PR</sup></a>	Farm modernisation	Share of farms receiving investment support to restructure and modernise, including to improve resource efficiency
<a href="#">R.10<sup>PR</sup></a>	Better supply chain organisation	Share of farms participating in producer groups, producer organisations, local markets, short supply chain circuits and quality schemes supported by the CAP
<a href="#">R.11</a>	Concentration of supply	Share of value of marketed production by producer organisations or producers' groups with operational programmes in certain sectors
<a href="#">R.12</a>	Adaptation to climate change	Share of utilised agricultural area (UAA) under supported commitments to improve climate adaptation
<a href="#">R.13<sup>PR</sup></a>	Reducing emissions in the livestock sector	Share of livestock units (LU) under supported commitments to reduce emission of greenhouse gases and/or ammonia, including manure management
<a href="#">R.14<sup>PR</sup></a>	Carbon storage in soils and biomass	Share of utilised agricultural area (UAA) under supported commitments to reduce emissions or to maintain or enhance carbon storage (including permanent grassland, permanent crops with permanent green cover, agricultural land in wetland and peatland)

Result indicators  
07/03/2024 – Version 18.0

<a href="#">R.15</a>	Renewable energy from agriculture, forestry and from other renewable sources	Supported investments in renewable energy production capacity, including bio-based (in MW)
<a href="#">R.16</a>	Investments related to climate	Share of farms benefitting from CAP investment support contributing to climate change mitigation and adaptation, and to the production of renewable energy or biomaterials
<a href="#">R.17<sup>PR</sup></a>	Afforested land	Area supported for afforestation, agroforestry and restoration, including breakdowns
<a href="#">R.18</a>	Investment support to the forest sector	Total investment to improve the performance of the forestry sector
<a href="#">R.19<sup>PR</sup></a>	Improving and protecting soils	Share of utilised agricultural area (UAA) under supported commitments beneficial for soil management to improve soil quality and biota (such as reducing tillage, soil cover with crops, crop rotation included with leguminous crops)
<a href="#">R.20<sup>PR</sup></a>	Improving air quality	Share of utilised agricultural area (UAA) under supported commitments to reduce ammonia emission
<a href="#">R.21<sup>PR</sup></a>	Protecting water quality	Share of utilised agricultural area (UAA) under supported commitments for the quality of water bodies
<a href="#">R.22<sup>PR</sup></a>	Sustainable nutrient management	Share of utilised agricultural area (UAA) under supported commitments related to improved nutrient management
<a href="#">R.23<sup>PR</sup></a>	Sustainable water use	Share of utilised agricultural area (UAA) under supported commitments to improve water balance
<a href="#">R.24<sup>PR</sup></a>	Sustainable and reduced use of pesticides	Share of utilised agricultural area (UAA) under supported specific commitments which lead to a sustainable use of pesticides in order to reduce risks and impacts of pesticides such as pesticides leakage
<a href="#">R.25</a>	Environmental performance in the livestock sector	Share of livestock units (LU) under supported commitments to improve environmental sustainability
<a href="#">R.26</a>	Investments related to natural resources	Share of farms benefitting from CAP productive and non-productive investment support related to care for the natural resources
<a href="#">R.27</a>	Environmental or climate-related performance through investment in rural areas	Number of operations contributing to environmental sustainability and the achievement of climate mitigation and adaptation goals in rural areas
<a href="#">R.28</a>	Environmental or climate-related performance through knowledge and innovation	Number of persons benefitting from advice, training, knowledge exchange, or participating in European Innovation Partnership (EIP) operational groups supported by the CAP related to environmental or climate-related performance
<a href="#">R.29<sup>PR</sup></a>	Development of organic agriculture	Share of utilised agricultural area (UAA) supported by the CAP for organic farming, with a split between maintenance and conversion

Result indicators  
07/03/2024 – Version 18.0

<a href="#">R.30<sup>PR</sup></a>	Supporting sustainable forest management	Share of forest land under commitments to support forest protection and management of ecosystem services
<a href="#">R.31<sup>PR</sup></a>	Preserving habitats and species	Share of utilised agricultural area (UAA) under supported commitments supporting biodiversity conservation or restoration including high-nature-value farming practices
<a href="#">R.32</a>	Investments related to biodiversity	Share of farms benefitting from CAP investment support contributing to biodiversity
<a href="#">R.33</a>	Improving Natura 2000 management	Share of total Natura 2000 area under supported commitments
<a href="#">R.34<sup>PR</sup></a>	Preserving landscape features	Share of utilised agriculture area (UAA) under supported commitments for managing landscape features, including hedgerows and trees
<a href="#">R.35</a>	Preserving beehives	Share of beehives supported by the CAP
<a href="#">R.36<sup>PR</sup></a>	Generational renewal	Number of young farmers benefitting from setting up with support from the CAP, including a gender breakdown
<a href="#">R.37</a>	Growth and jobs in rural areas	New jobs supported in CAP projects
<a href="#">R.38</a>	LEADER coverage	Share of rural population covered by local development strategies
<a href="#">R.39</a>	Developing the rural economy	Number of rural businesses, including bio-economy businesses, developed with CAP support
<a href="#">R.40</a>	Smart transition of the rural economy	Number of supported smart-village strategies
<a href="#">R.41<sup>PR</sup></a>	Connecting rural Europe	Share of rural population benefitting from improved access to services and infrastructure through CAP support
<a href="#">R.42</a>	Promoting social inclusion	Number of persons covered by supported social inclusion projects
<a href="#">R.43<sup>PR</sup></a>	Limiting antimicrobial use	Share of livestock units (LU) concerned by supported actions to limit the use of antimicrobials (prevention/reduction)
<a href="#">R.44<sup>PR</sup></a>	Improving animal welfare	Share of livestock units (LU) covered by supported actions to improve animal welfare

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.1<sup>PR</sup> Enhancing performance through knowledge and innovation:</b> Number of persons benefitting from advice, training, knowledge exchange or participating in European Innovation Partnership (EIP) operational groups supported by the CAP in order to enhance sustainable economic, social, environmental, climate and resource efficiency performance. <a href="#">[back to overview]</a>
Definition and aim	To quantify the coverage of interventions supporting the provision of knowledge, innovation-generation and exchange for agriculture and rural areas to enhance sustainable economic, social, environmental, climate and resource efficiency performance, including animal welfare and health, thus contributing to all specific objectives defined in Article 6 and in particular to the cross-cutting objective on knowledge and innovation in Article 5. We are accounting here the number of people who “benefit” from the funded measure, regardless of who receive the payments.
Types of intervention concerned	Following types of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it:  For Rural Development: <ul style="list-style-type: none"> <li>• Article 78 of Regulation (EU) 2115/2021: Knowledge exchange and dissemination of information</li> <li>• Article 77(1)(a) of Regulation (EU) 2115/2021: prepare and implement the projects of the EIP operational groups referred to in Article 127(3)</li> </ul> For Sectoral types of interventions: <ul style="list-style-type: none"> <li>• Advice and training: Article 47(1)(b) and (c) in the F&amp;V, hops, olive oil and table olives sectors and the other sectors referred to in Article 42(f)</li> <li>• Research, experimental and innovative production methods: Article 47(1)(a) in the F&amp;V, hops, olive oil and table olives sectors and the other sectors referred to in Article 42(f)</li> <li>• For wine sector, Article 58(1) and (e) "tangible and intangible investments in innovation for knowledge exchange"</li> </ul>
Unit of measurement	Number of persons
Moment of data collection	Operations for which a first payment to the beneficiary was made in the Financial Year concerned. <b>This indicator is cumulative over the period.</b>
Methodology	Number of persons benefitting from relevant paid support: <ul style="list-style-type: none"> <li>- The number of persons is cumulated over time.</li> <li>- The benefitting person is accounted at the first payment (although it is a partial payment) of the training/advice/knowledge exchange action or project.</li> <li>- The benefitting person is not necessarily the person receiving the payment (e.g. support for advice is paid to the advisor, while here the number of persons benefitting from the advice is taken into account)</li> </ul>

**DISCLAIMER**

*The document has no legal binding value and does not bind the European Commission in relation to the approval of the CAP strategic plans and their amendments.*

## Result indicators

07/03/2024 – Version 18.0

	<ul style="list-style-type: none"><li>- All persons participating in EIP operational groups (Article 77(1)(a) in relation to EIP Operational Group projects in accordance with Article 127) and in Knowledge exchange and dissemination of information (all interventions under Article 78) for which a payment was made in the Financial Year concerned are included.</li><li>- Only the PO members benefitting from advice and other knowledge and innovation actions for which the POs received a payment are included.</li></ul>
Comments/caveats	<p>Cooperations other than EIP with a main budget dedicated to training and advice could be accounted here.</p> <p>Whatever the length of the training/advice action (hours or days), the beneficiary is accounted the same way (in full).</p> <p>There might be double counting of beneficiaries, as a person could benefit of training through various channels and several times during the programming period. However, avoiding double counting in the planning and reporting would be too burdensome in view of the benefit it would bring.</p> <p>Regarding the implementation of research programs in apiculture, all participants to the research activity (including scientists) are not accounted here.</p>

## Result indicators

07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.2 Linking advice and knowledge systems:</b> Number of advisors receiving support to be integrated within the Agricultural Knowledge and Innovation Systems (AKIS) <a href="#">[back to overview]</a>
Definition and aim	To quantify the support provided to advisors from relevant CAP interventions effectively contributing to integration within in the Agricultural Knowledge and Innovation Systems (AKIS). The term “advisor” identifies a person (NB: not the entity, institutes or organisations), which is engaged in any of the advisor linked interventions supporting knowledge flows within the AKIS.
Types of intervention concerned	The following types of interventions may be concerned if advisors are participating: <ul style="list-style-type: none"> <li>• <b>Cooperation (including EIP Operational Groups)</b> (Article 77, in particular for Article 127): e.g. when advisors participate in or help to set up innovative projects of EIP Operational Groups</li> <li>• <b>Knowledge exchange and dissemination of information</b> (Article 78): covering many possible actions on integration of advisors within the AKIS, for instance: setting up of specific advisory services for innovation support; (obligatory) training of advisors; exchange visits for advisors; advisors participating in cross-fertilisation meetings with farmers, researchers, and CAP networks, etc. (see AKIS part in the Cross-cutting objective tool)</li> </ul>
Unit of measurement	Number of advisors
Moment of data collection	When a related payment was made in the Financial Year concerned. <b>This indicator is cumulative over the period</b>
Methodology	Number of advisors supported by interventions related to advisors’ integration into the AKIS: <ul style="list-style-type: none"> <li>• Participants in relevant actions of specific interventions set up in the CAP strategic plan designed in order to increase advisors’ capacity and qualification and their integration within the AKIS: to improve knowledge flows, linkages with research, networks, and innovation support services, etc.) (Article 114)</li> <li>• No fixed lists of advisors needed in advance, <b>all</b> impartial advisors count, whether public or private. The list of advisors is built along the years through their participation in relevant actions.</li> <li>• Multiple activities for an individual advisor each count separately. An advisor participating in e.g. 2 trainings over the projection period is counted twice (illustrating a more intense integration in the AKIS).</li> </ul>
Comments/caveats	Where the focus of activities (training, exchange visits etc.) is on reinforcing advisory capacity and their better integration within AKIS, all participants are counted, since all are expected to use the knowledge gained to support others – it is not necessary for providers to identify participants who are formally advisors.

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.3 Digitalising agriculture:</b> Share of farms benefitting from support for digital farming technology through CAP <a href="#">[back to overview]</a>
Definition and aim	To quantify the coverage of interventions promoting digital farming technologies and their use with CAP support through advice, European Innovation Partnership (EIP) Operational Group projects and physical investment support.
Types of intervention concerned	The following types of interventions may be concerned, subject to the purpose of the intervention designed by Member States and <b>only if pertaining to digital farming technology:</b> <ul style="list-style-type: none"> <li>• For Rural development: <ul style="list-style-type: none"> <li>- Knowledge exchange and dissemination of information (Article 78): e.g. advice, training and information to build farmers' and advisors' digital skills;</li> <li>- Cooperation projects (Article 77): EIP Operational Groups' innovative projects or advisory networks on digital topics;</li> <li>- Physical investments in digital farming technology, including for knowledge exchange (Article 73).</li> </ul> </li> <li>• Investments for sectoral types of interventions</li> </ul>
Unit of measurement	%
Moment of data collection	For annual and multi-annual operations, beneficiaries are counted starting from the Financial Year when the first payment is made. <b>This indicator is cumulative over the period.</b>
Methodology	$\frac{\text{Number of beneficiaries from relevant paid support}}{\text{Total numbers of farms}}$ <p><u>Numerator:</u></p> <ul style="list-style-type: none"> <li>- The number of beneficiaries is cumulated over time.</li> <li>- The beneficiary counts as 1 as from the first payment for the whole programming period.</li> </ul> <p><u>Denominator:</u></p> <p>Total number of farms - EUROSTAT (Farm structure survey): <a href="#">ef_m_farmleg</a>. See context indicator C.12 (Agricultural holdings).</p>
Comments/caveats	<ul style="list-style-type: none"> <li>• Beneficiaries of training, for example, that are not farmers can be included in the numerator.</li> <li>• There might be double counting of beneficiaries because the same beneficiary could benefit from training and investment support. However, in this instance, double counting is acceptable in the planning and reporting given that it would be too burdensome to avoid it in view of the benefit that this would bring.</li> </ul>

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.4 Linking income support to standards and good practices:</b> Share of utilised agricultural area (UAA) covered by income support and subject to conditionality <a href="#">[back to overview]</a>
Definition and aim	The indicator, expressed as a percentage of the total UAA, reflects the share of the area covered by income support, while respecting and enhancing the environment, the climate, human, plant and animal health as well as animal welfare. It measures the total number of <b>physical hectares</b> that are in principle used for an agricultural activity by beneficiaries of income support in the Financial Year concerned, and that are subject to conditionality (Article 12(1)).
Types of intervention concerned	The following types of interventions are considered as income support and are subject to conditionality (based on Article 12(1)): <ul style="list-style-type: none"> <li>- Basic income support for sustainability including round sum payment for small farmers (BISS, Chapter II, Section 2, Subsection 2)</li> <li>- Complementary redistributive income support for sustainability (CRISS, Article 29)</li> <li>- Complementary income support for young farmers (CIS-YF, Article 30)</li> <li>- Schemes for the climate, the environment and animal welfare (Article 31)</li> <li>- Coupled income support interventions (Chapter II, Section 3, Subsection 1)</li> <li>- Crop-specific payment for cotton (Chapter II, Section 3, Subsection 2)</li> <li>- Payment for natural or other area-specific constraints (Article 71)</li> <li>- Payment for area-specific disadvantages resulting from certain mandatory requirements (Article 72): only for agricultural areas</li> </ul>
Unit of measurement	%
Moment of data collection	Hectares determined in the Financial Year concerned <b>This indicator is annual.</b>
Methodology	<u>Number of hectares determined</u> Total Utilised Agricultural Area
	<u>Numerator:</u>  Total hectares <b>determined</b> for BISS/Payments for small farmers (before applying the entitlements where relevant) + hectares paid outside that BISS eligible area.
	<u>Denominator:</u> Utilised Agricultural Area in hectares in EUROSTAT annual survey on crop production: <a href="#">apro_cpsh1 – Main area</a> . See context indicator C.17 (Agricultural area).

## Result indicators

07/03/2024 – Version 18.0

	<ul style="list-style-type: none"> <li>• Payments to forest areas included in areas of natural or other specific constraints are not accounted in the numerator and the denominator.</li> <li>• Areas of outermost regions are accounted in the numerator and in the denominator of this indicator when these areas are granted ANC support.</li> </ul>
Comments/caveats	<ul style="list-style-type: none"> <li>• For Member States with entitlements, it is too burdensome to avoid the double counting as the geospatial location of the hectares paid is not possible. Thus, the simplification proposed in the methodology section of this indicator fiche. Moreover, the schemes support the income of the whole farm. Nonetheless, the hectares paid outside that BISS eligible area are to be taken into account by all Member States, as this area may not be marginal (e.g. CIS in farms that are not eligible to BISS).</li> <li>• Beneficiaries of coupled income support to livestock: all agricultural areas should be accounted into the numerator, even those hectares that are not paid under any CAP instruments.</li> <li>• Farmers need to respect conditionality to receive support for Environmental, climate and other management commitments (Article 70). However, this type of intervention is not accounted in this result indicator concentrating on income support.</li> <li>• Statistical surveys conducted by the Member States sometimes exclude some small beneficiaries that are below the survey hectare threshold – e.g. DE and DK. This could result in a share of UAA that is higher than 100%.</li> </ul>

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.5 Risk Management:</b> Share of farms with supported CAP risk management tools <a href="#">[back to overview]</a>
Definition and aim	To quantify the coverage of risk management tools.
Types of intervention concerned	<p>The following types of interventions are concerned:</p> <ul style="list-style-type: none"> <li>• Risk management tools under Rural Development (Article 76): premiums for insurance schemes and mutual funds, including income stabilisation tools, and other innovative risk management tools.</li> <li>• Sectoral types of intervention: interventions related to crisis prevention and risk management</li> </ul> <p>The respective interventions may be different in nature, as e.g. premiums for insurance are paid annually, while for mutual funds the support relates to the set-up.</p> <p>For sectoral types of intervention, they may include e.g.:</p> <ul style="list-style-type: none"> <li>○ F&amp;V, hops, olive oil and table olives sectors and ‘other sectors’ as defined in Article 42(f), Article 47(2), e.g. setting-up , filling and replenishing of mutual funds, investments to prevent crises, collective storage, replanting of orchards due to health or phytosanitary reasons, market withdrawal, green and non-harvesting, harvest and production insurance.</li> <li>○ Wine sector: green harvesting (Article 58(1)(c)), harvest insurance (Article 58(1)(d)), mutual funds (Article 58(1)(i)).</li> </ul>
Unit of measurement	%
Moment of data collection	<p>For annual interventions: interventions for which a payment was made in the Financial Year concerned.</p> <p>For mutual funds: see below.</p> <p><b>This indicator is annual.</b></p>
Methodology	<p style="text-align: center;"><u>Number of farms benefitting from relevant support</u> Total number of farms</p> <p><u>Numerator:</u></p> <ul style="list-style-type: none"> <li>- Annual number of beneficiaries for annual interventions.</li> <li>- For a mutual fund, all the participants in the fund are to be included.</li> <li>- For mutual funds set up with Rural Development support, the number of beneficiaries corresponds to the number of participants in the fund for the relevant Financial Year. In the year/years of set-up, this will be an estimate, in subsequent years the actual number.</li> <li>- For risk management actions implemented by POs, only the number of ultimate beneficiaries is to be accounted where it can be determined; in case of collective actions all PO members (farms) should be counted.</li> </ul>

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.6<sup>PR</sup> Redistribution to smaller farms:</b> Percentage of additional direct payments per hectare for eligible farms below average farm size (compared to average) <a href="#">[back to overview]</a>
Definition and aim	<p>This indicator indicates the average additional direct payments (DP) per hectare granted to beneficiaries below average farm size, compared to the average DP per hectare granted to the entire population of beneficiaries.</p> <p>The income support to be considered here is the total of DP, in order to reflect the extent of the redistribution of DP towards smaller farms expected from the reform.</p> <p>If the indicator is above 100%, it implies that beneficiaries below average farm size receive - on average - an amount per hectare exceeding the average.</p>
Types of interventions concerned	<p><b>ALL</b> direct payment interventions, <u>except Cotton</u></p> <ul style="list-style-type: none"> <li>- Basic income support for sustainability (BISS) including round sum payment for small farmers (Chapter II, Section 2, Subsection 2)</li> <li>- Complementary redistributive income support for sustainability (CRISS) (Article 29)</li> <li>- Complementary income support for young farmers (CIS-YF) (Article 30)</li> <li>- Schemes for the climate, the environment and animal welfare (Article 31)</li> <li>- Coupled income support interventions (Chapter II, Section 3, Subsection 1)</li> </ul>
Unit of Measurement	%
Moment of data collection	Expenditure and hectares paid in the Financial Year concerned. <b>This indicator is annual.</b>
Methodology	$\frac{\text{Average DP/ha paid to beneficiaries below average farm size} * 100}{\text{Average DP/ha paid to all beneficiaries}}$ <p>For this indicator <b>two average amounts of direct payments per hectare</b> need to be calculated and compared:</p> <ol style="list-style-type: none"> <li>(1) The average direct payments per hectare for the sub-population of <b>beneficiaries below the average farm size</b> during the relevant financial year.</li> <li>(2) The average direct payments per hectare for <b>the whole population</b> of beneficiaries during the relevant financial year;</li> </ol> <p><u>Step 1: Identify the population of “beneficiaries below average farm size”.</u></p>

DISCLAIMER

*The document has no legal binding value and does not bind the European Commission in relation to the approval of the CAP strategic plans and their amendments.*

## Result indicators

07/03/2024 – Version 18.0

	<p>1) <u>Determine the average farm size in hectares of CAP beneficiaries that year</u> Using a proxy, i.e. the number of determined hectares for direct payments, as defined in accordance with Article 4(4) held by beneficiaries of BISS (including payments for small farmers) (before taking into account the entitlements), divided by the total number of beneficiaries.</p> <p>2) <u>Determine the population of beneficiaries of DP that year with an area paid below the average farm size</u> <u>Beneficiaries with 0 ha determined for BISS (before application of entitlements) are not taken into account in the population of beneficiaries below the average farm size.</u></p> <p><u>Step 2: Calculate the average amount of DP per hectare for the whole population of beneficiaries and for those below average farm size:</u></p> <p>1) <b>Numerator:</b> the total amount of DP paid to beneficiaries during the financial year concerned, after reduction but before penalties i.e. any amount of DP paid during the financial year concerned, whether paid within the regulatory payment deadline or not.</p> <p>2) <b>Denominator:</b> the total number of <b>determined</b> hectares for direct payments as defined in accordance with Article 4(4), held by beneficiaries of BISS (including payments for small farmers) (before taking into account the entitlements). It is a good proxy for the net number of hectares granted support, without double counting.</p> <p>3) <b>Average amount = Numerator / Denominator</b></p> <p><u>Step 3: Calculate the indicator</u></p> <p>The indicator is calculated by dividing the average DP per hectare for beneficiaries below average farm size by the average DP per hectare for the entire population of beneficiaries, and then multiplying by 100 to obtain a percentage. Where the indicator is greater than 100%, there is a redistribution of the aid from bigger to smaller beneficiaries and the value will show the average additional percentage paid per hectare to smaller farms.</p>
Comments/caveats	<ul style="list-style-type: none"> <li>- Coupled income support to livestock payments are accounted into the numerator.</li> <li>- Cotton is excluded from this indicator, as the Member States have no margin of manoeuvre on this intervention: the amounts to be paid are laid down in the legislation.</li> <li>- Support to Areas with Natural Constraints (ANC) is not included here because although supporting income, the indicator aims at measuring the redistribution of direct payments. ANC support is included in R.4 and R.7.</li> </ul>

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.8 Targeting farms in specific sectors:</b> Share of farmers benefitting from coupled income support for improving competitiveness, sustainability or quality. <a href="#">[back to overview]</a>
Definition and aim	<p>This indicator would reflect the extent of the support provided in sectors undergoing difficulties, in terms of share of farms. Such support shall aim at improving the competitiveness, the sustainability or the quality of the production in these sectors.</p> <p>For example, a value of 10 % means that 10 % of the farms receive support, under Coupled Income Support, to improve the competitiveness, the sustainability or the quality in sectors undergoing difficulties.</p> <p>This indicator is a single aggregate for all sectors actually covered by Coupled Income Support (CIS) in the respective Member States.</p>
Types of intervention concerned	<p>All area-based and animal-based coupled income support interventions (Articles 32-34).</p> <p>N.B.: It does not include the crop-specific payment for cotton.</p>
Unit of measurement	%
Moment of data collection	<p>Beneficiaries paid in the Financial Year concerned.</p> <p><b>This indicator is annual.</b></p>
Methodology	<p style="text-align: center;"><u>Number of beneficiaries of coupled income support</u> Total number of farms</p> <p><u>Numerator:</u> Total number of beneficiaries (i.e. actually paid in the Financial Year concerned) of CIS (regional + national interventions).</p> <p><b>Remark:</b> No double counting, each beneficiary shall be counted only once, even if this beneficiary benefits from support under more than one CIS intervention.</p> <p><u>Denominator:</u> Total number of farms - EUROSTAT (Farm structure survey): <a href="#">ef_m farmleg</a>. See context indicator C.12 (Agricultural holdings).</p>
Comments/caveats	<p>This indicator is not broken down by sector for simplification. A breakdown per sector would mean having up to 22 sub-indicators, which would be quite extensive and burdensome for Member States. In any case, if needed for analytical purposes, the outputs O.10 and O.11 can be used.</p>

DISCLAIMER

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.9<sup>PR</sup> Farm modernisation:</b> Share of farms receiving investment support to restructure and modernise, including to improve resource efficiency <a href="#">[back to overview]</a>
Definition and aim	To quantify the coverage of interventions providing investment support to restructure and modernise holdings, including to improve resource efficiency.
Types of intervention concerned	<p>The following types of interventions may be concerned, subject to the purpose of the intervention designed by Member States:</p> <ul style="list-style-type: none"> <li>• Investments (Article 73)</li> <li>• Sectoral types of interventions implying an investment.</li> </ul> <p>For sectoral types of interventions, it may include e.g. investments in tangible and non-tangible assets taking place on farms (Article 47(1)(a)), investments aimed at reducing emissions and waste (Article 47(1)(a)(vii)), restructuring and conversion of vineyards (Article 58(a)). It includes all productive investments, including those to improve resource efficiency (e.g. investments to reduce food losses and food waste).</p> <p>Investments in “new irrigation” installations on farm leading to a net increase in irrigated area would be linked to this indicator. Non-productive investments to improve resource efficiency focusing on environmental and climate-related benefits would be accounted for under R.16 and R.26.</p>
Unit of measurement	%
Moment of data collection	Investment operations for which a first payment to the beneficiary was made in the Financial Year concerned. <b>This indicator is cumulative over the period.</b>
Methodology	<p style="text-align: center;"><u>Number of beneficiaries receiving relevant support</u> Total number of farms</p> <p><u>Numerator:</u> The number of beneficiaries is cumulated over time, without double counting. The beneficiary counts as 1 as from the first payment.</p> <p><u>Denominator:</u> Total number of farms – EUROSTAT (Farm structure survey): <a href="#">ef_m_farmleg</a>. See context indicator C.12 (Agricultural holdings).</p>
Comments/caveats	<p>This indicator relates to primary agricultural production, farmers’ investments in other gainful activities of the holding and off-farms investments are reported under R.39.</p> <p>If during the programming period, a farmer benefits from several investments operations, it counts only as 1.</p> <p>For collective investments, all farmers benefitting from the investment should be counted.</p>

07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.10<sup>PR</sup> Better supply chain organisation:</b> Share of farms participating in producer groups, producer organisations, local markets, short supply chain circuits and quality schemes supported by the CAP <a href="#">[back to overview]</a>
Definition and aim	To quantify the coverage of interventions to promote supply chain organisation with CAP support.
Types of intervention concerned	<p>The following types of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it:</p> <ul style="list-style-type: none"> <li>• Cooperation (Article 77)</li> <li>• Sectoral types of interventions (part of Chapter III of Title III)</li> </ul> <p>For sectoral types of interventions, it includes all farmers and non-farmers that are members and take part in recognised Producer Organisations (POs) with operational programmes supported by the CAP in the F&amp;V, hops, olive oil and table olive sectors and the other sectors referred to in Article 42(f) and which types of interventions are set in Article 47. When the beneficiary is an Association of Producer Organisations (APO) and the PO members do not manage their own operational programmes, the farmer members and non-farmer members of the POs that compose the APO shall be counted.</p> <p>For rural development, it includes all farms participating in cooperation interventions with the aim e.g. to promote local markets, short supply chains and quality schemes or to set up POs.</p>
Unit of measurement	%
Moment of data collection	For sectoral types of interventions, recognised producer organisations with an operational programme paid in the Financial Year concerned. For cooperation, operations for which a first payment to the beneficiary was made in the Financial Year concerned. <b>This indicator is cumulative over the period.</b>
Methodology	<p style="text-align: center;"><u>Number of beneficiaries from relevant support</u> Total number of farms</p> <p><u>Numerator:</u></p> <ul style="list-style-type: none"> <li>- All PO members (farmers or other actors) of POs, including non-active members and farmers from other Member States, benefiting from an operational programme should be accounted, whether the POs manage their own operational programmes or only benefit from a programme managed by their APO.</li> <li>- For Rural Development support, the number of farms corresponds to the number of direct participants in the cooperation project for the relevant Financial Year. In the year of set-up (e.g. PO), this will be an estimate, in subsequent years the actual number is to be reported.</li> </ul> <p><u>Denominator:</u> Total number of farms – EUROSTAT (Farm structure survey): <a href="#">ef_m_farmleg</a>. Result indicators  
07/03/2024 – Version 18.0

Comments/caveats	There might be double counting of beneficiaries from relevant support, as a farmer could be member of benefitting PO and a direct participant in a cooperation project. However, avoiding the double counting in the planning and for reporting would be too burdensome in view of the benefit it would bring. Nonetheless, members of PO cannot be accounted twice as part of a PO and APO.

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.13<sup>PR</sup> Reducing emissions in the livestock sector:</b> Share of livestock units (LU) under supported commitments to reduce emissions of greenhouse gases and/or ammonia, including manure management <a href="#">[back to overview]</a>
Definition and aim	To quantify progress in the implementation of interventions <u>targeted to livestock but without link to land that are</u> aimed at reducing greenhouse gas (GHG) emissions and/or ammonia, including manure management, feed efficiency, and feed additives.
Types of intervention concerned	The following types of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it: <ul style="list-style-type: none"> <li>• Sectoral interventions in livestock sectors aiming at mitigating climate change (Article 47(1)(a)(i))</li> <li>• Schemes for the climate, the environment and animal welfare (Article 31).</li> <li>• Environmental, climate-related and other management commitments (Article 70)</li> </ul> <p>In some cases, only certain operations within an intervention may be concerned. All interventions/operations concerned must be quantifiable in Livestock units (LU).</p>
Unit of measurement	%
Moment of data collection	Livestock units for which a related payment was made in the Financial Year concerned (payment per head, livestock unit). The total number of LU should be counted even if only a partial payment was made. <b>This indicator is annual.</b>
Methodology	<u>Number of Livestock Units for which a related payment was made</u> Total Number of Livestock Units
	<u>Numerator:</u> Number of Livestock Units for which a payment under relevant interventions was made in Financial Year concerned, without double counting. For commitments paid in hectares but targeted to livestock, the number of livestock units covered is estimated.
	<u>Denominator:</u> Number of animals expressed in Livestock Units – EUROSTAT December Livestock Survey. Tables <a href="#">[apro mt ls]</a> .
Comments/caveats	The coefficients to convert animal numbers in Livestock Units are included in the annex of the Commission Implementing Regulation (EU) 2021/2290. Commitments to convert to or maintain organic farming are not included here. On-farm investments on reducing GHG emissions should be captured in R.16 and those on reducing ammonia in R.26. For off-farm investments, the relevant indicator is R.27 in both cases. In some cases both on-farm indicators would be relevant, e.g. investment for biogas production, as it contributes to reduce both kind of emissions (R.15 is also relevant in this case for the renewable energy produced).

<b>Indicator name</b>	<b>R.20<sup>PR</sup> Improving air quality:</b> Share of utilised agricultural area (UAA) under supported commitments to reduce ammonia emission <a href="#">[back to overview]</a>
Definition and aim	To quantify the coverage of commitments to reduce ammonia emissions with CAP support.
Types of intervention concerned	The following types of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it: <ul style="list-style-type: none"> <li>• Schemes for the climate, the environment and animal welfare (Article 31)</li> <li>• Environmental, climate-related and other management commitments (Article 70)</li> </ul> <p>In some cases, only certain operations within an intervention may be concerned. All interventions/operations concerned must be quantifiable in hectares.</p>
Unit of measurement	%
Moment of data collection	Hectares for which a payment was made in the Financial Year concerned. The total area should be counted even if only a partial payment was made. <b>This indicator is annual.</b>
Methodology	<u>Number of hectares</u> Total Utilised Agricultural Area
	<u>Numerator:</u> Area under commitment, i.e. area determined after controls and before applying any limits in the Financial Year concerned for relevant eco-schemes and management commitments without double counting (i.e. physical area).
	<u>Denominator:</u> Utilised Agricultural Area in hectares in EUROSTAT annual survey on crop production: <a href="#">apro_cpsh1 – Main area</a> . See context indicator C.17 (Utilised Agricultural area).
Comments/caveats	Interventions (commitments) to reduce ammonia emissions targeted to livestock are included in R.13.  Investments to reduce ammonia emissions should be captured in R.9 and/or R.26.

<b>Indicator name</b>	<b>R.25 Environmental performance in the livestock sector:</b> Share of livestock units (LU) under supported commitments to improve environmental sustainability <a href="#">[back to overview]</a>
Definition and aim	To quantify progress in the implementation of interventions aimed at improving environmental sustainability in the livestock sector. While programme specific commitments paid per LU aiming at reducing ammonia and GHG emissions are accounted in R.13, R.25 aims at covering all other commitments beneficial to the environment, especially support to endangered breeds under Article 70. It relates to commitments paid per LU, as commitments paid per ha beneficial for biodiversity and natural resources are reported under other relevant result indicators (e.g. R.31).
Types of intervention concerned	The following types of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it: <ul style="list-style-type: none"> <li>• Environmental, climate-related and other management commitments (Article 70) (support to endangered breeds).</li> <li>• Sectoral types of interventions (Article 47(1))</li> </ul> <p>For sectoral types of interventions, it includes support to practices paid per livestock unit and contributing to protecting natural resources and biodiversity. In some cases, only certain operations within an intervention may be concerned. All interventions/operations concerned must be quantifiable in Livestock units (LU).</p>
Unit of measurement	%
Moment of data collection	Livestock units for which a payment was made in the Financial Year concerned (payment per head or livestock unit). The total number of LU should be counted even if only a partial payment was made. <b>This indicator is annual.</b>
Methodology	$\frac{\text{Number of Livestock Units for which a related payment was made}}{\text{Total Number of Livestock Units}}$ <p><b>Numerator:</b> Number of <u>Livestock Units</u> for which a payment under relevant interventions was made in Financial Year concerned, without double counting.</p> <p><b>Denominator:</b> Number of animals expressed in Livestock Units – EUROSTAT December Livestock Survey. Tables <a href="#">[apromt ls]</a>.</p>
Comments/caveats	The coefficients to convert animal numbers in LU are published by EUROSTAT, see <a href="#">here</a> . Support to endangered breeds is included here. Commitments paid per LU aiming at reducing GHG emissions and/or ammonia, including manure management are captured in R.13.

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.35 Preserving beehives: Share of beehives supported by the CAP</b>
Definition and aim	To quantify the coverage of interventions supporting the apiculture sector with the CAP, granted directly to beekeepers. <a href="#">[back to overview]</a>
Types of intervention concerned	<p>The following type of interventions may be concerned:</p> <ul style="list-style-type: none"> <li>• Types of intervention in the apiculture sector and Union financial assistance (Article 55)</li> <li>• Investments (Article 73)</li> <li>• Environmental, climate-related and other management commitments (Article 70)</li> </ul> <p>For sectoral types of interventions, it includes only the support granted directly to beekeepers under Article 55(1)(b) for:</p> <ul style="list-style-type: none"> <li>(i) combatting beehive invaders and diseases, in particular varroasis;</li> <li>(ii) preventing damage caused by adverse climatic events and promoting the development and use of management practices adapted to changing climate conditions;</li> <li>(iii) restocking of beehives in the Union including bee breeding;</li> <li>(iv) rationalising transhumance.</li> </ul>
Unit of measurement	%
Moment of data collection	Operations for which a first payment to the beneficiary was made in the Financial Year concerned. <b>This indicator is cumulative over the period.</b>
Methodology	$\frac{\text{Number of beehives for which a related payment was made}}{\text{Total number of beehives}}$ <p><b>Numerator:</b> For sectoral interventions, the number of beehives belonging to the beneficiaries of the Apiculture sectoral programme is to be reported, whether the support is paid per beekeeper, per action or per beehive. For agri-environment-climate commitments paid beehives are reported every year and for investment under Rural Development programmes, the number of beehives covered by the investment project is reported from the first payment of investments. The number of beehives is cumulated over time, <b>without double counting</b>. The beehives count as 1 as from the first payment.</p> <p><b>Denominator:</b> Total number of beehives notified to the EU Commission: average of the latest three years available at the time of establishing the plan.</p>
Comments/caveats	To increase the robustness of the indicator it is important to avoid double counting. Thus, for feasibility reasons and to remain proportionate, the types of intervention referred to Article 55(1), (a) and (c) to (g) are not accounted in R.35.

## Result indicators

07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.37 Growth and jobs in rural areas: New jobs supported in CAP projects</b> <a href="#">[back to overview]</a>
Definition and aim	To quantify the number of jobs created and jobs safeguarded (through e.g. support to generational renewal) in supported projects.
Types of intervention concerned	<p>The following types of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it:</p> <ul style="list-style-type: none"> <li>• Complementary income support for young farmers (CIS-YF) (Article 30)</li> <li>• Installation of young farmers, rural business start-up, and new farmers (Article 75)</li> <li>• Investments (Article 73)</li> <li>• Cooperation (Article 77)</li> <li>• Sectoral types of interventions</li> </ul> <p>For sectoral types of intervention it may include e.g. investments (Article 47(1)(a) and Article 58(1)(b)).</p> <p>The indicator includes both young farmer payment under Pillar I as well as young farmers receiving the installation grant to set-up (Pillar II). This is because both types of support encourage generational renewal, Pillar II supports the setting-up of new farmers while Pillar I supports the economic viability of newly set-up farmers.</p>
Unit of measurement	Number of jobs created in full time equivalent (FTE)
Moment of data collection	<p>Operations for which the last payment to the beneficiary was made in the Financial Year concerned.</p> <p><i>[Exception: for projects financed with FI, information on jobs is to be collected at the time of the signature of the loan contract]</i></p> <p><b>This indicator is cumulative over the period.</b></p>
Methodology	<p>The number of jobs are cumulated over time, without double counting. The job counts as 1 as from the last payment.</p> <ul style="list-style-type: none"> <li>• For investments, cooperation, and sectoral types of interventions: it is based on the number of generated jobs in the supported project, expressed in FTE.</li> <li>• For installation and start-up support: number of jobs (in FTE) created once the project is fully implemented</li> <li>• For young farmers Member States can use R.36, although reported at the first payment</li> </ul> <p>The number of jobs is calculated based on the completed operations.</p>
Comments/caveats	<p>Only new jobs actually created and jobs safeguarded (through e.g. support to generational renewal, which is a form of support for job creation) should be counted. It relates to employment when the project is up and running, i.e. if the project is creation of a farm shop, it does not include employment created during the design/construction phase – consultant/architect/builders, but the employment, which is created when the shop is running (manager, sales assistants, etc.).</p>

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.38 LEADER coverage:</b> Share of rural population covered by local development strategies <a href="#">[back to overview]</a>
Definition and aim	To quantify the share of rural population covered by LEADER interventions.
Types of intervention concerned	The following type of interventions are concerned: <ul style="list-style-type: none"> <li>• Cooperation (Article 77) - LEADER</li> </ul>
Unit of measurement	%
Moment of data collection	The total rural population covered is recorded at selection of local development strategies by MA/LAG, after each selection round. <b>This indicator is cumulative over the period.</b>
Methodology	<p style="text-align: center;"><u>Rural population covered by LAGs funded through LEADER over the programming period</u> Total rural population</p> <p><u>Numerator:</u> Rural population covered by LAGs funded under LEADER. The population is cumulated over time.</p> <p><u>Denominator:</u> Member States may use the rural population they notify to Eurostat based on the definition of rural area used by Eurostat. Alternatively, Member States can establish other criteria for the definition of rural area.</p>
Comments/caveats	While LEADER interventions can include ones for preparatory support, this indicator counts the population covered in the territories with approved LAG partnerships and strategies for implementation. For simplification at the initial planning stage, the LEADER intervention could be attributed to only this indicator. LEADER intervention (Article 77) may be concerned in a number of other resulted indicators, which will be only indicated based on the approved strategies through a later modification of the Plans and through the annual reporting

## Result indicators

07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.39 Developing the rural economy:</b> Number of rural businesses, including bio-economy businesses, developed with CAP support <a href="#">[back to overview]</a>
Definition and aim	<p>To quantify CAP support to SMEs, Non-profit organisations, public authorities, farms’ diversification to develop rural economy businesses (excluding support to farming, i.e. primary agricultural production), including bio-economy businesses. This indicator is not restricted to new businesses created.</p> <p>The <u>bio-economy</u> covers all sectors and systems that rely on biological resources (animals, plants, micro-organisms and derived biomass, including organic waste), their functions and principles. It includes and interlinks: land and marine ecosystems and the services they provide; all primary production sectors that use and produce biological resources (agriculture, forestry and all economic and industrial sectors that use biological resources and processes to produce food, feed, bio-based products, energy and services).</p> <p>Whilst support to farming, i.e. primary agricultural production, is included in R.9, this indicator focuses on CAP support to businesses creating additional value from the products and by-products of agriculture and forestry. This includes typically:</p> <ul style="list-style-type: none"> <li>• Post-harvest transformation, conditioning, processing or storage of food products</li> <li>• Collection, logistics, storage or conditioning of by-products</li> <li>• Production of bio-based products and materials, bioenergy or intermediate products susceptible of further transformation.</li> <li>• Valorisation of food losses and food waste</li> <li>• Recovery and reuse of nutrients and/or organic matter in agriculture and forestry</li> </ul> <p>To be accounted for, activities should clearly contribute to the CAP objectives, notably promoting employment, growth, social inclusion and local development in rural areas, ensuring a fair income to farmers and rebalancing the power in the value chain.</p>
Types of intervention concerned	<p>The following types of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it:</p> <ul style="list-style-type: none"> <li>• Installation of young farmers and new farmers and rural business start-up (Article 75)</li> <li>• Investments (Article 73)</li> <li>• Cooperation (Article 77)</li> <li>• Sectoral types of interventions</li> </ul> <p>For sectoral types of interventions, it may concern any tangible investments realised by other businesses than farmers or by farmers</p>

## Result indicators

07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.40 Smart transition of the rural economy:</b> Number of supported smart-village strategies <a href="#">[back to overview]</a>
Definition and aim	To quantify the number of Smart Villages strategies or projects developed and/or implemented with CAP support.
Types of intervention concerned	The following type of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it: <ul style="list-style-type: none"> <li>• Investments (Article 73)</li> <li>• Installation of young farmers and new farmers and rural business start-up (Article 75)</li> <li>• Cooperation (Article 77)</li> <li>• Knowledge exchange and dissemination of information (Article 78)</li> </ul> <p>In some cases, only certain operations within an intervention may be concerned.</p>
Unit of measurement	Number of strategies
Moment of data collection	Operations for which a first payment was made in the Financial Year concerned. <b>This indicator is cumulative over the period.</b>
Methodology	The strategy is included from the first payment.  <b>Remark:</b> Double counting of the same strategy should be avoided. If the same strategy is supported through several operations, the strategy should be counted only once.
Comments/caveats	Smart Villages are rural communities that promote local initiatives to find practical solutions to economic, social and/or environmental challenges and make the most of new opportunities, using digital technologies where appropriate. Smart Villages can relate to a village hub delivering a range of services and bringing facilities closer to the people. A rural network of co-working spaces, an e-health project enhancing services for the elderly through smart homecare, digital training course for farmers and rural entrepreneurs, and an online platform to facilitate carpooling at designated hitch-hiking spots were among the projects supported in the current programming period and could be considered elements of a Smart Village strategy. To know more about Smart Villages: <a href="#">How to support Smart Villages strategies which effectively empower rural communities?</a> <sup>2</sup>

## Result indicators

07/03/2024 – Version 18.0

	<p><b><u>Numerator:</u></b>  Number of LU for which a payment under relevant interventions was made in the Financial Year concerned, without double counting.  For management commitments and schemes for the climate, the environment and animal welfare that address antimicrobial use, paid LU are reported every year.  For relevant interventions paid per hectare like support to organic farming and for investments on livestock farms, it requires estimating the related number of LU.  This estimation is based on the yearly production capacity expressed as the number of LU, using the standard conversion rates of animals to livestock units included in the annex of the Commission Implementing Regulation (EU) 2021/2290, e.g.:</p> <ul style="list-style-type: none"> <li>• for a pig fattening activity with a building of 500 places the number of LU to be reported is: <math>500 * 0.3 \text{ LU} = 150 \text{ LU}</math></li> <li>• for a pig breeding building with 200 places for sows the number of LU to be reported is: <math>200 * 0.5 \text{ LU} = 100 \text{ LU}</math>.</li> </ul> <p>This number of LU, related to an investment, is reported each year from the first payment.</p> <p>Double counting should be avoided (if e.g. a beneficiary receives support for management commitments and investments over the same programming period). Where a livestock unit is supported from multiple interventions, that livestock unit should be counted only once.</p> <p>The coefficients to convert animal numbers in Livestock Units are published by EUROSTAT, see <a href="#">here</a>.</p> <p><b><u>Denominator:</u></b>  Number of animals expressed in Livestock Units – EUROSTAT December Livestock Survey. Tables <a href="#">[apro mt ls]</a>.</p>
<p>Comments/caveats</p>	<p>In January 2022, the new Regulation (EU) 2019/6 on veterinary medicinal products will start to apply. It provides for a wide range of practices to promote a more prudent and responsible use of antimicrobials in animals, e.g. by restricting prophylactic and metaphylactic use. In order to help maintain animals healthy and prevent infections from occurring, therefore reducing the need to use antimicrobials, preventive measures may be taken, such as improved biosecurity measures, improved animal husbandry, better hygiene practices, vaccination.</p>

Result indicators  
07/03/2024 – Version 18.0

<b>Indicator name</b>	<b>R.44<sup>PR</sup> Improving animal welfare:</b> Share of livestock units (LU) covered by supported actions to improve animal welfare <a href="#">[back to overview]</a>
Definition and aim	To quantify the coverage of actions aimed at improving animal welfare with CAP support.
Types of intervention concerned	<p>The following types of interventions may be concerned, when specific requirements or conditions linked to the intervention can justify it:</p> <ul style="list-style-type: none"> <li>• Schemes for the climate, the environment and animal welfare (Article 31)</li> <li>• Environmental, climate-related and other management commitments (Article 70)</li> <li>• Sectoral types of interventions</li> <li>• Investments (Article 73)</li> </ul> <p>For sectoral types of interventions, it includes e.g. investments as well as other actions for biosecurity, animal health and welfare (Article 47(1)(a)(vi)) and organic production (Article 47(1)(d)).</p> <p>Not all interventions supporting animal welfare are paid per livestock units (LU). For example, in organic livestock breeding, animal welfare requirements are higher and the support is paid per hectare. Organic support can be granted via eco-schemes or agri-environment-climate and other management commitments. The methodology to account for this CAP support is explained below.</p> <p>In some cases, only certain operations within an intervention may be concerned. All interventions concerned must be quantified in livestock units.</p> <p><b>For monitoring, a breakdown by species is to be provided.</b></p>
Unit of measurement	%
Moment of data collection	<p>Livestock units (LU) for which a related payment was made in the Financial Year concerned (payment per head, livestock unit or investments).</p> <p>The total number of LU should be counted in full even if only a partial payment was made.</p> <p><b>This indicator is annual (but investments are accounted cumulatively over the period).</b></p>
Methodology	$\frac{\text{Number of livestock units for which a related payment was made}}{\text{Total number of LU}}$ <p><u>Numerator:</u> Number of LU for which a payment under relevant interventions was made in the Financial Year concerned, without double counting. For management commitments and eco-schemes for animal welfare, paid LU are reported every year.</p>

## Result indicators

07/03/2024 – Version 18.0

	<p>For relevant interventions paid per hectare like support to organic farming and for investments on livestock farms, it requires estimating the related number of LU (see R.43).</p> <p>For investments, e.g. in buildings improving animal welfare, the number of LU is estimated based on the production capacity, using the standard conversion rates of animals to LU included in the annex of the Commission Implementing Regulation (EU) 2021/2290, e.g.:</p> <ul style="list-style-type: none"> <li>• for a pig fattening building with 500 places the number of livestock units to be reported is: <math>500 * 0.3 \text{ LU} = 150 \text{ LU}</math></li> <li>• for a pig breeding building with 200 places for sows the number of livestock units to be reported is: <math>200 * 0.5 \text{ LU} = 100 \text{ LU}</math>.</li> </ul> <p>This number of LU, related to an investment, is reported each year from the first payment.</p> <p>For relevant interventions paid per hectare, which would contribute to improve animal welfare (such as organic farming), a similar calculation as the one used for investments can be used.</p> <p>The coefficients to convert animal numbers in LU are published by EUROSTAT, see <a href="#">here</a>.</p> <p>Double counting should be avoided (if e.g. a beneficiary receives support for management commitments and investments over the same programming period). Where a livestock unit is supported from multiple interventions, that livestock unit should be counted only once.</p> <p><u>Denominator:</u> Number of animals expressed in Livestock Units - EUROSTAT December Livestock survey. Tables <a href="#">[apromts]</a>.</p>
Comments/caveats	<p>In order to improve animal welfare, Member States may support actions (notably commitments or investments) such as:</p> <ul style="list-style-type: none"> <li>• supplying water, feed and animal care in accordance with the natural needs of animal husbandry;</li> <li>• improving housing conditions, such as increased space allowances, flooring surfaces, enrichment materials, natural light;</li> <li>• offering outdoor access;</li> <li>• promoting practices which avoid mutilation and/or castration of animals, or in specific cases when mutilation or castration of animals is deemed necessary, provide for the use of anaesthetics, analgesia and anti-inflammatory medication or immune-castration.</li> </ul>
