

Monitoring EU Agri-Food Trade: Development until October 2015

October 2015 - EU agri-food exports to Russia going up again

After a notable drop in August, the value of EU agri-food exports has resumed the positive trend in September and **October 2015**. Export values in October increased by EUR 0.45 billion (+4%) compared to the month before. Interestingly, exports of **non-banned products** to **Russia** continued to resume on a monthly base (+13%, in particular wine, spirits, cigarettes and raw tobacco). Also exports to **Turkey** increased by 20% in October 2015 compared to September. On the other hand, agri-food exports to China, Brazil and some Arabian countries slightly went down.

The highest increases in monthly export values were witnessed for **wine** (EUR +108 million), **vegetables** (EUR +87 million), **raw hides and**

skins (EUR +61 million), **infant food** (EUR +57 million) and **cotton** and other fibers (EUR +52 million).

In October 2015, not only agri-food exports but also **imports** to the EU went up compared to the previous month (EUR +465 million; +5%). Imports of coarse grains, tropical fruit, palm oil, but also of wine and vegetables were at a higher level in October compared to September 2015. EU imports from the Turkey, the US and Canada went up the most, and also imports from Ukraine increased compared to the month before.

The **trade balance** for all EU agri-food products in October 2015 showed a surplus in exports of about EUR 2 billion.

12-month period: Exports still at record level

In the 12 months period November 2014 to October 2015, EU agri-food exports to third countries attained the amount of almost EUR 128 billion, meaning an increase by 5.3% in value compared to the same period one year ago. Outstanding export values were achieved in October 2014 and in March and July 2015.

Over the 12 months period, major gains in export values were achieved in the **USA** (+19%) **China** (+39%), now second export destination gaining the place of Russia, as well as on other key markets such as **Saudi Arabia** (+30%), **Turkey** (+24%) and **South Korea** (+20%). Exports to countries such as Switzerland, Australia, Egypt and the United Arab Emirates also increased in November 2014 to October 2015 compared to the same period one year ago. Due to the ban, **Russia** fell down to fourth position as the overall EU agri-food exports to Russia decreased from EUR 10 billion to EUR 5.7 billion (-43%) over the considered period.

Analysing the 12 months export performance per product category, export values increased in particular for **cereals** other than wheat (EUR +1.3 billion; +74%), **wine** (EUR +752 million; +8%), **spirits and liqueurs** (EUR +665 million; +7%) as well as for **hides, skins and furskins** (EUR +588 million; +26%), for **infant food** and other milk and cereals preparations (EUR +441 million; +7.6%) and for **beer** (EUR +418 million; +15%).

On the negative side, **milk powders, cheese, fruit** and **vegetables** lost in export values over the 12 months period, all of them products concerned by the Russian embargo. Also exports in oilseeds (other than soyabeans) and sheep and goat meat suffered a loss by around 13% in export values, although at lower absolute value compared to the products mentioned before.

EU Agri-Food Imports: slight increase over last 12 months

In the period November 2014 to October 2015 total agri-food imports from third countries amounted to more than EUR 111 billion, corresponding to an increase by 8% compared to the same period one year ago. On a monthly base, imports went up in October 2015 compared to September 2015 by 5%.

Analysing the origin, imports from **Brazil**, the traditional first EU supplier, remained quite stable, with a slight increase by 4% in October 2015 compared to September. Imports from the **USA**, which is already an important supplier, further increased (EUR +1.4 billion; +14%) over the last 12 months. Remarkable increases were recorded for agri-food imports from **Turkey** (EUR +947 million; +24%), from **Argentina** (EUR +468 million; +9%), from **Vietnam** (EUR +414 million; +23%), and from **Colombia** (EUR +355 million; +22%). On the other hand, imports from **Ukraine** decreased by EUR -723 million; -17%.

Analysing 12-month-data per product category, total imports of commodities in value terms remained almost stable (-0.7%), but, in detail, imports of **cereals** other than wheat and rice decreased remarkably (EUR -1.3 billion; -40%), as well as for: **soybeans** (EUR -424 million; -8%), beet and cane **sugar** (EUR -417 million; -24%), oilcakes and palm oil. On the other hand, imports of unroasted **coffee**, tea and mate, increased sizeably (EUR +1.5 billion; +23%) as well as imports of **wheat** and **cocoa beans**.

For other products than commodities, increases were registered in particular for **tropical fruit, nuts** and **spices** (EUR +2.7 billion; +27%), fruit and vegetable preparations (EUR +770 million; +26%), as well as fresh fruit (+11.5%), fresh vegetables (+8%), and raw tobacco (+14%).

It is worth also to underline the increasing imports of **olive oil** (especially from Tunisia), which grew by about five times from EUR 118 million in the period November 2013 to October 2014 to EUR 724 million in the same period one year later.

(Publication date: 18 December 2015)

Focus on: Trade with Middle-East North African (MENA) countries

The MENA region¹ is home to about 400 million inhabitants, a region with large and growing imports of agricultural commodities.

The EU is a net-exporter of agri-food products to the MENA region. Export values increased steadily from EUR 13.5 billion in 2010 to EUR 22 billion in 2014 (+50%). In 2014, MENA countries absorbed about 17% of all EU agri-food exports in value terms.

Most important export products to the MENA region are wheat and other cereals (25% of all agri-food export values to MENA, in particular to Algeria, Iran and Egypt), milk powder and infant formula (Algeria and Saudi Arabia) as well as cigars and cigarettes and food preparations.

¹ For this analysis we consider Algeria, Bahrain, Egypt, Iran, Iraq, Israel, Jordan, Kuwait, Lebanon, Yemen, United Arab Emirates, Libya, Morocco, Oman, Palestine, Qatar, Saudi Arabia, Syria.

Saudi Arabia and Algeria are the most important destinations for EU agri-food exports with annual values of around EUR 3.5 billion each. They are followed by the United Arab Emirates (EUR 2.7 billion in 2014), Egypt (EUR 1.9 billion) and Morocco (EUR 1.6 billion).

In 2014, the EU was net exporter in agri-food countries to all MENA countries, with an export surplus worth EUR 17.5 billion in 2014. Most important origins for EU agri-food imports from the region are Morocco (EUR 1.5 billion in 2014), Israel (EUR 0.9 billion) and Egypt (EUR 0.8 billion).

Main import products are fruit and vegetables, including preparations and juices (more than two third of total value of agri-food imports from the region in 2014) and olive oil.

EU agri-food trade with MENA countries (in million Euro)
