

CAP 2023 – 2027 FIRST RESULTS OF SIMPLIFICATION SURVEY FROM FARMERS' VIEWS

12.04.2024

Karl Bauer, COPA

CAP 2023 – 2027 - FIRST RESULTS OF SIMPLIFICATION SURVEY FROM FARMERS' VIEWS

- new delivery model
 - CAP is the basis for EU-food security and farmers
 - CAP strategic plans keep the instruments
 - analysis of requirements and SWOT, interventions
- green architecture / new enhanced conditionality
- Simplification and reduction of the administrative burden
 - documentation requirements
 - new technologies
 - proportionality of controls and sanctions

CAP 2023 – 2027 - FIRST RESULTS OF SIMPLIFICATION SURVEY FROM FARMERS' VIEWS

- green architecture
- new ENHANCED conditionality
- (very) late legal security for farmers
 - lead to „unbalanced” attraction for several interventions esp. ecoschemes
 - shortcome of financial security for farmers
 - **need for keeping the „purchasing power“ of the compensation payments** facing the inflation since their final calculation
 - positive reaction: improving voluntary approach

CAP 2023 – 2027 - FIRST RESULTS OF SIMPLIFICATION SURVEY FROM FARMERS' VIEWS

- Simplification as a principle and an ongoing process
 - „duty“ for the next mandate-period after EP-elections
- Reduction of the administrative burden
 - need for a check „fit for farmers“ not only in the CAP
 - Documentation requirements in existing and upcoming legal acts e.g. EUDR, FSDN, soil monitoring law etc.
- strengthen advisory services for farmers
- more space for flexibility
 - strengthen subsidiarity and practicability

Agriculture is and in future has to be recognized as a strategic matter of the EU

Key message => **Facing Farmers on Eye Level**
