pieces by country

The changes / 2019

It is not possible to repeat the work "as is", as there are several difficulties:

- Difficulties in recovering old data (2020, 2021 until week 46)
- Lack of data for BE and DK (previously received by email)
- Brexit

Reflection on the improvements to be made, on the evolution of the pieces of pork to be presented (Loin, Belly, Shoulder) but also on the calculation of the breakdown of the indexes by country. If you think some data is more relevant than others, if you have ideas for improvement or if you can send us data that we are missing, please let us know.
