The Swedish Board of Agriculture is responsible for applications, payment and on the spot checks related to the scheme. During the year, no education authority has been involved. As we in Sweden distribute the milk in connection with school meals, we do not revise the program annually, but it runs during the years the strategic plan applies. We use the existing curricula for complementary measures. In all grades from preschool to high school, there are parts of the curriculum that came about healthy food, agriculture, ecology, etc.
