

Update on avian influenza in the EU

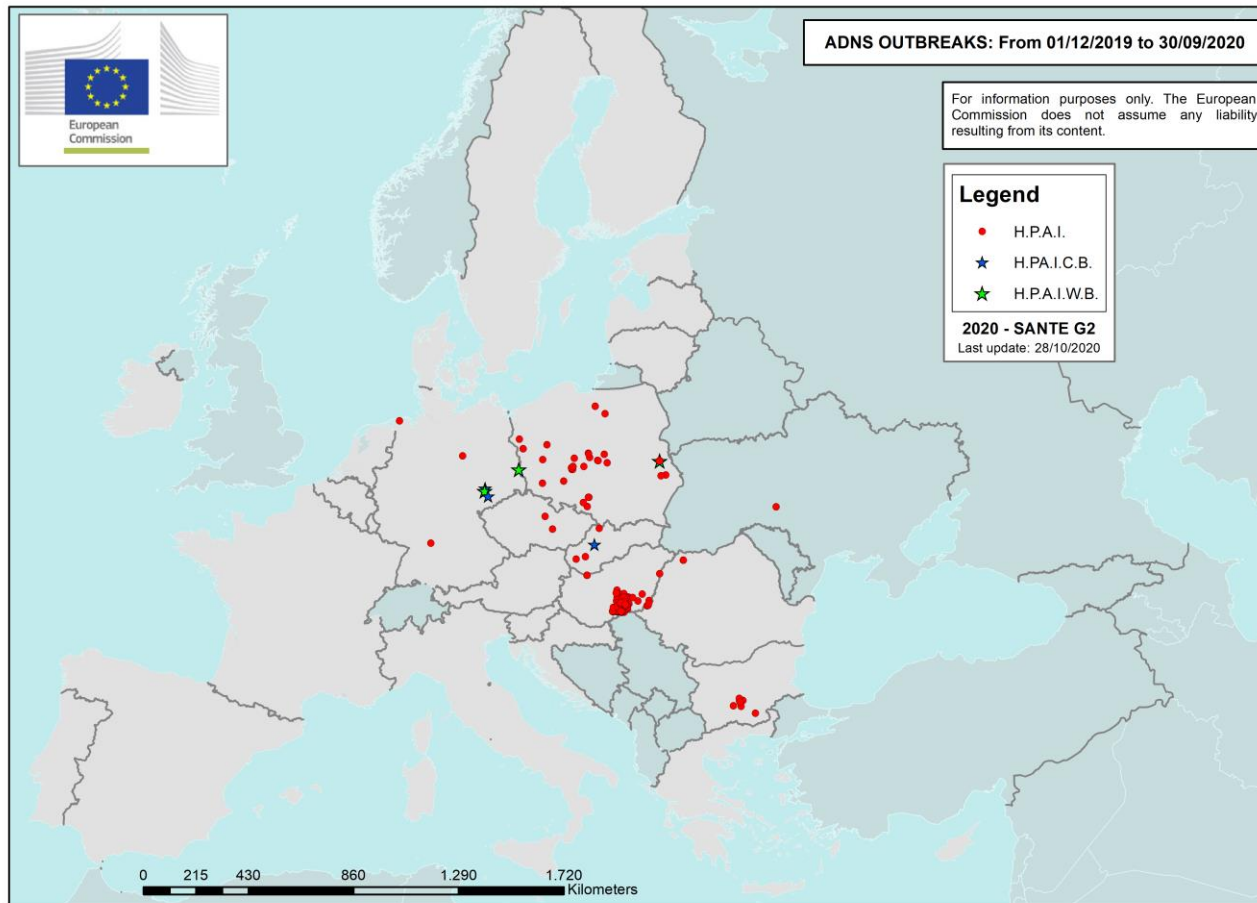

CDG ANIMAL PRODUCTS SECTOR POULTRY & EGGS 3 November 2020

**European Commission,
DG Health and Food Safety
Unit G2 – Animal Health**

Distribution of HPAI outbreaks in Europe *by epidemic season and week*

Distribution map of HPAI in Europe (Jan-Sept 2020)

Overview of HPAI in EU (Jan-Sept 2020)

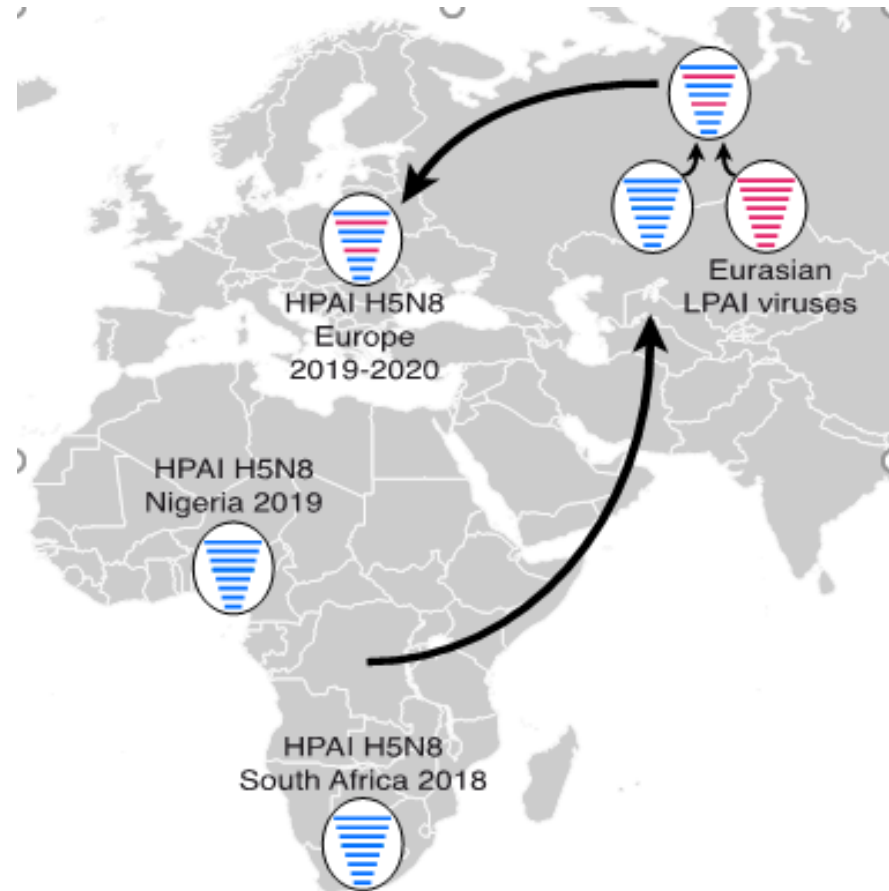

Member State	Poultry	Captive birds	Wild birds	Virus subtype
HUNGARY	273			H5N8
POLAND	35		1 hawk	H5N8
BULGARIA	9			5 x H5N8 3 x H5N2 1 x H5N8/H5N2
GERMANY	3	2	1 white fronted goose 1 common buzzard	H5N8
SLOVAKIA	3	1		H5N8
CZECHIA	2			H5N8
ROMANIA	2			H5N8
Total	327	3	3	

HPAI in EU in (Jan-Sept 2020)

Phylogenetic analysis of HPAI H5N8 virus

The 2020 H5N8 HPAI virus:

- **different from the previous viruses** that circulated in Europe.
- **reassortant virus which has emerged in EurAsia** before reaching the EU countries:
 - ✓ similarity at HA, NE gene segment with a virus collected in Nigeria in 2019 and with the South African virus A/quail/South Africa/AI5930/2018 (H5N8)
 - ✓ similarity with LPAI viruses (H3N8, H12N5) identified in wild birds in those areas of EurAsia (near Kazakhstan) during 2017-2018

HPAI in EU in (Jan-Sept 2020)

Commission's DG SANTE actions

PROTECTIVE MEASURES at Union level

- ✓ **20 Implementing Decisions** adopted to:
 - establish or amend regionalisation
 - extend duration of the restrictions
 - introduce additional protective measures

TECHNICAL SUPPORT

✓ **2 EUVET missions**

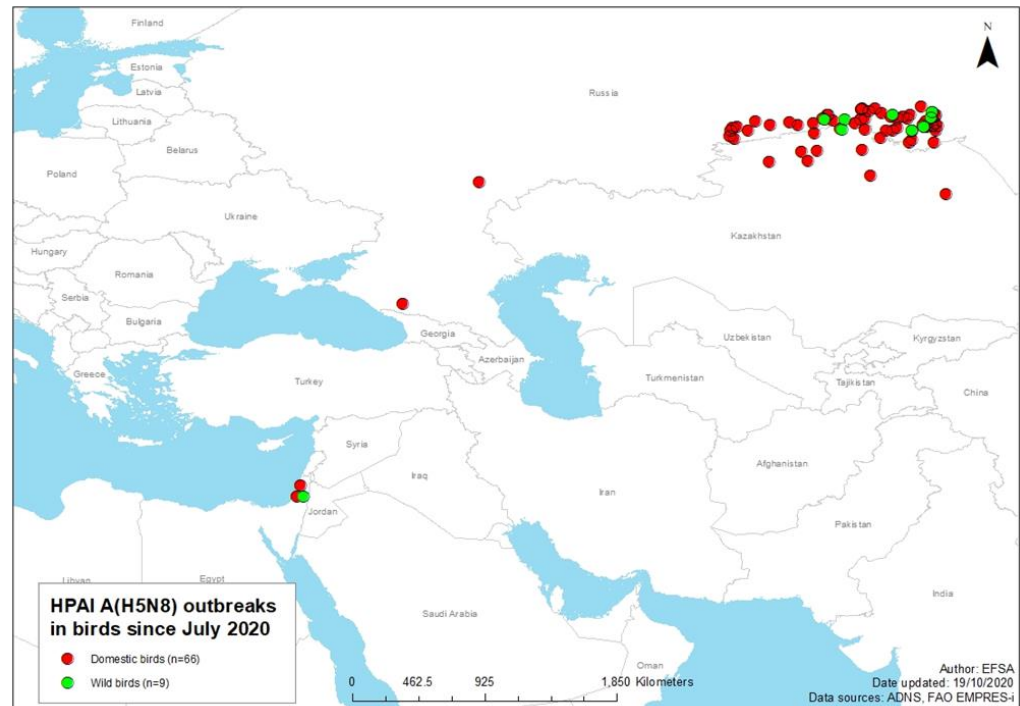

- January, in PL
- July, in HU, with a team of experts from FR (experience in similar poultry production system)

✓ **1 Sustain Technical Assistance mission (STM)** (WEB) in BG, in April

FINANCIAL SUPPORT for emergency measures (Regulation (EU) 652/2014)

HPAI - warning signs

- H5N8 detected in last months in poultry and wild birds in Russia, Kazakhstan and recently in Israel
- possible spread via wild birds migrating to the EU in the coming months
- Member States were informed about the increase level of risk

HPAI current situation

❑ no HPAI in poultry, captive birds or wild birds between 5 June and 23 October 2020

❑ **new HPAI developments with H5N8 subtype:**

➤ **8 detections in wild birds in NL:**

- **Mute Swan** (Cygnus Olor) – non - migratory, first confirmation on 23 October
- **Eurasian Wigeon** (Mareca penelope) - migratory, confirmed on 26 October
- other positive wild birds species: Cormorant, Greylag Goose, Barnacle goose

➤ **5 detections in wild birds in DE :**

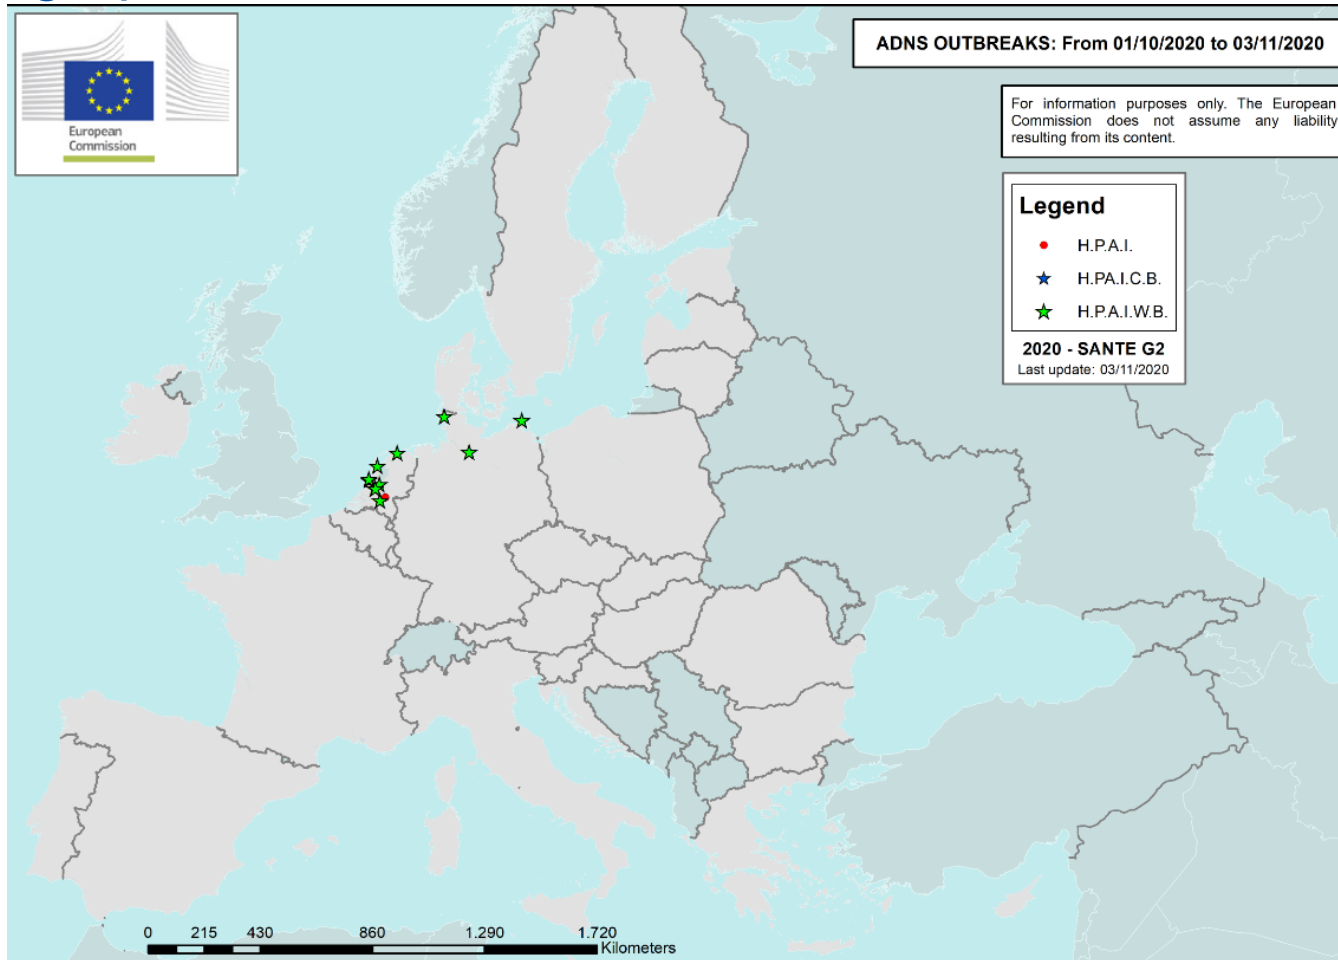

- **Eurasian Wigeons, Eurasian buzzard** (Buteo buteo), **Peregrine falcon, Numenius**, confirmed on 30 October

➤ **1 outbreak** in a **broiler parent stock farm in NL**, confirmed on 29 October

❑ virus is **not directly related to the H5N8 viruses detected** in Eastern Europe and Germany **in the beginning of 2020**

❑ Commission implementing Decision on **interim protective measures in relation with HPAI in poultry in NL was adopted on 30 October 2020**

Geographical distribution of current HPAI detections

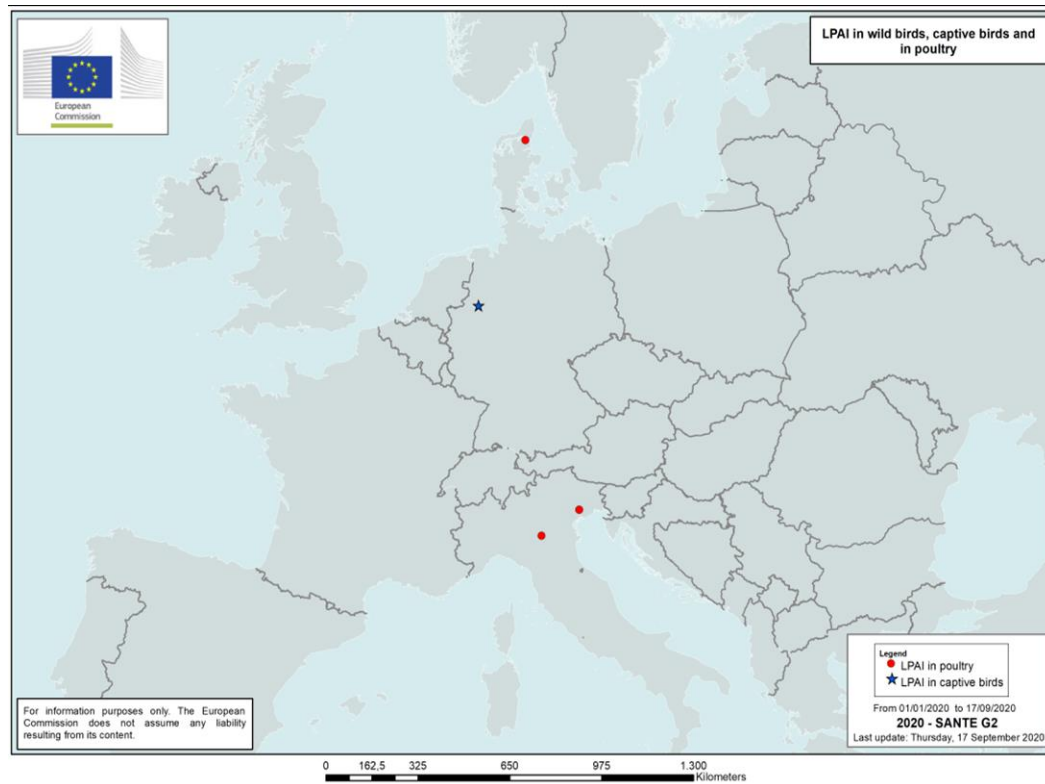

Decision 2018/1136

on *risk mitigation and reinforced biosecurity* measures and *early detection systems*

- identification of the '**high risk areas**'
- risk mitigation and **reinforced biosecurity measures**
- **awareness** raising
- **early detection** systems in poultry flocks
- **increased surveillance** in wild birds
- **additional temporary measures** in the event of confirmation of cases of HPAI in wild birds

LPAl in EU in Jan-Oct 2020
