[TABLES](#)

EU27 does not include the United Kingdom which left the EU on 31/01/2020. Trade with the UK is reported as trade with a third country in this publication, for the current period and the reference periods, although single market conditions still applied to the UK. UK trade data may be underestimated at the time of reporting and official statistics may be corrected at later stage.

JANUARY - MAY 2020: EU27 AGRI-FOOD TRADE ON A SLIGHT DOWNWARD TREND

During the first five months of 2020, EU27 agri-food trade (exports plus imports) reached a value of **EUR 128.5 billion**; i.e. 1.6% more than in January-May 2019. The current growth remained to be driven by higher agri-food exports which increased by 2.1% compared to the corresponding period in 2019, reaching **EUR 75.8 billion**. EU27 imports attained **EUR 52.7 billion**, 0.9% higher than the same five months period in 2019. However, the monthly values of EU27 exports and imports continued to fall in May 2020 by 7.5% and 4.5%, respectively, below the level of previous month, corresponding to the economic slowdown triggered by the COVID-19 pandemic.

STRONG GROWTH OF EU27 EXPORTS TO CHINA AND MENA COUNTRIES

On a year over year basis, the highest increases in export values (January-May 2020 compared to January-May 2019) were recorded in trade with **China** (EUR +1 934 million, +38%). This upward trend remained to be driven by consequences of African Swine Fever in China as well as by the impact of COVID-19 pandemic. Tripled increase in EU27 export value of pig meat to China is reflected in the EU27 overall rise in exports of pig meat. Other products with highest gains in export values to China include wheat (EUR +248 million from minimal level during the reference period), offal meat (+37%), and infant food (+15%).

Other top destinations, for which the value of EU27 agri-food exports have increased most since January 2020 (EUR million), were **Saudi Arabia** (+464, +33%), **Morocco** (+326, +39%) - in both cases driven by increased exports of wheat and barley; **Algeria** (+313, +30% - wheat) and **Switzerland** (+185, +5% - vegetables, fruit, citrus fruit and cheese).

During the first five months of 2020, EU27 also recorded major export gains to **Iran** (+174, +72%) and **Nigeria** (+168, +47%) thanks to exceptionally high exports of wheat.

On the other hand, EU27 export values continued to fall most to the **United Kingdom** (-899, -5%), although single market conditions still apply. Similarly to developments in previous months, while decreasing exports to the UK have affected the majority of EU agri-food products, categories such as wine (-19%), cigars and cigarettes (-27%), preparations of fruit and vegetables (-8%), poultry meat (-12%), and cheese (-9%) declined most in value terms.

Since January 2020, EU27 exports to **the United States** (-402, -5%) have been also steadily declining, driven in particular by a fall in exports of spirits and liqueurs (-24%), wine (-14%), beer (-11%), fruit juices (-50%) and pig meat

(-33%). Exports of EU cheese, affected by the US punitive tariffs, fell by 10% comparing to the corresponding period last year.

Other destinations with continued important reductions in export values EU27 exports include **Hong Kong** (-203, -17% - wine), **Singapore** (-202, -25% - spirits and liqueurs) and **Lebanon** (-143, -33% - all major EU agri-food categories).

The most important EU27 export destinations in the first five months of 2020 were the UK, the USA, China, Switzerland and Japan. More than 51% of EU agri-food exports went to these five countries.

CONTINUED GOOD DYNAMIC OF EU27 EXPORTS OF CEREALS AND PIGMEAT

Looking at product categories, the increase in export values (January-May 2020 compared to January-May 2019, EUR million) was driven in particular by continued strong export growth of **wheat** (+1487, +63%- thanks to competitive prices and strengthened international demand), **pig meat** (+1404, +51%- largely to China), **coarse grains** (+465, +51%), pet food (+247, +12%) and infant food (+220, +6%). On the other hand, biggest losses for EU exports (in value terms) remained to be reported for **wine** (-914, -15%), **spirits and liqueurs** (-835, -26%), **raw hides and skins** (-440, -70%), **cotton** (-234, -36%), **chocolate and confectionary** (-205, -6%).

The top EU agri-food export products in the period January-May 2020 included wine, pig meat, wheat, infant food, as well as pasta and pastry. These products accounted for more than 25% of EU27 total agri-food exports.

CONTINUED STRONG GROWTH OF OILSEEDS IMPORTS FROM CANADA

During the first five months of 2020, the value of EU27 agri-food imports has slightly increased by almost 1% (compared to January-May 2019). Continued strong rise of palm oil imports has placed **Indonesia** (+561, +34%) and **Malaysia** (+300, +43%) as the first and third top origin with biggest increases. **Canada** (+496, +79%) came second with record high imports of rapeseed (+ 546%) and imports of soya beans (+430%), going back to its historical levels. Other major increases included **Turkey** (+292, +18% - nuts and citrus fruit, preparations of vegetables and fruit), **Cote d'Ivoire** (+239, +17% - cocoa beans), and **Brazil** (+220, +5% - soya beans). Other origins for which the value of EU27 agri-food imports increased most, were **Morocco** (+154, +12%- fruit and tropical fruit) and the **Russian Federation** (+139, +22%- sunflower seeds, oilcakes).

During the period January-May 2020, the value of monthly imports from **UK** continued to fall (-807, -12%). While decreasing imports from the UK have affected the majority of agri-food products, categories such as spirits and liqueurs (-26%), chocolate and confectionary (-17%), pasta and pastry (-17%) continued to show highest reductions in terms of import values. Other countries, for which EU27 imports decreased most, include **the United States** (-416, -9%; decline largely driven by falling imports of soya beans by 40%); **India** (-240, -19% - other feed and feed ingredients, oilcakes); **Ukraine** (-217, -7%, mainly driven by reductions in corn and wheat imports); and **Australia** (-130, -15%; oilseeds, wool).

other than citrus), unroasted coffee and tea, oilcakes and palm and palm kernel oil. They have accounted for nearly 50% of EU27 agri-food imports.

As a result, the agri-food export surplus during the period January-May 2020 stood at EUR **23.1 billion**, an increase by almost 5% compared to the corresponding period in 2019, despite the Covid-19 crisis. This net trade balance remained boosted by continued strong exports of **pig meat, wheat and coarse grains**. By contrast, the EU27 net trade balance further deteriorated to reach negative values for **raw hides and skins, citrus fruit and ethanol**.

The top EU agri-food origins in the five months period include the UK, Brazil, USA, Ukraine and China. These countries have accounted for almost 40% of EU27 agri-food imports.

EU27 IMPORT INCREASE DRIVEN BY FRUITS, PALM OIL, OILSEEDS AND VEGETABLE OILS

Looking at product categories, since the beginning of 2020, the highest increases in import values were reported for **fresh and dried tropical fruit** (+531, 10%), **palm and palm kernel oil** (+461, +22%), **rapeseed and sunflower seeds** (+423, 27%), **fatty acids and waxes** (+402, +42%) and **vegetable oils** (+317, +26%; rapeseed and sunflower oils).

On the other hand, imports of **coarse grains** (-607, -30%), **oilcakes** (-341, -12%), **raw tobacco** (-275, -23%), **spirits and liqueurs** (-262, -19%) and **bovine meat** (-153, -18%) have continued to decrease most in value terms. Furthermore, EU27 import values of wool, meat preparations and cut flowers and plants have remained on a downward trend.

The top EU agri-food import products in the first five months of 2020 included fruit (tropical and
