Article 12 – Plant production rules

Annex II – part I : Plant production rules

1.8.2 To obtain **organic plant reproductive material** to be used for the production of products other than plant reproductive material, the **mother plant** and, where relevant, other plants intended for plant reproductive material production shall have been produced in accordance with this Regulation for at least one generation, or, in the case of **perennial crops**, for at least one generation during two growing seasons;

Amendment introduced by Regulation (EU) 2022/474

1.8.6 **Competent authorities** or, where appropriate, control authorities or control bodies recognised in accordance with Article 46(1) **may authorise operators producing plant reproductive material** for use in organic production to use **non-organic plant reproductive material**, when mother plants or, where relevant, other plants intended for the production of plant reproductive material and produced in compliance with point 1.8.2 are not available in sufficient quantity or quality, and to place such material on the market for use in organic production provided that the following conditions are met:....

Section 2

Designations of origin, geographical indications and traditional terms in the wine sector

Article 93 – Definitions

(a) '**designation of origin**' means a name, including a traditionally used name, which identifies a product referred to in Article 92(1):

....

(v) which is obtained from vine varieties belonging to *Vitis vinifera* or a cross between the *Vitis vinifera* species and other species of the genus *Vitis*

(b) 'geographical indication' means a name, including a traditionally used name, which identifies a product referred to in Article 92(1):

....

(v) which is obtained from vine varieties belonging to *Vitis vinifera* or a cross between the *Vitis vinifera* species and other species of the genus *Vitis*

Action plan for organic production in the EU

3 axes:

STIMULATING DEMAND, ENSURING CONSUMER TRUST

STIMULATING CONVERSION, REINFORCING THE ENTIRE VALUE CHAIN

IMPROVING THE CONTRIBUTION OF ORGANIC FARMING TO SUSTAINABILITY

AXIS 3: IMPROVING THE CONTRIBUTION OF ORGANIC FARMING TO SUSTAINABILITY

Action 20:

Alternatives to contentious inputs and other plant protection products

The Commission:

□ *starting in 2023, intends to earmark **funding under Horizon Europe for research and innovation projects on alternative approaches to contentious inputs, paying particular attention to copper** and other substances as assessed by the European Food Safety Authority; and*

□ *starting in 2022, will, building on the forthcoming regulation on **biopesticides**, and via the **strengthened farm advisory services**, notably AKIS, foster where appropriate the use of alternative plant protection products, such as those containing biological active substances.*

Figure 9. Top 10 countries by area under organic vines as % of total area under vines in 2019

2.3.1 Europe

Certified organic vineyards are highly concentrated in Europe, which in 2019 accounted for 381 kha, or 84% of the world's total certified organic vineyard surface area.

Figure 10. Top 10 countries by average annual growth rate of area under organic vines over the period 2014–2019
