

December 2022

Factsheet on 2014-2020 Rural Development Programme for Bulgaria

The Bulgarian Rural Development Programme (RDP) was formally adopted by the European Commission on 26 May 2015, outlining Bulgaria's priorities for using € 2.9 billion of public money that is available for the period 2014-2020 (€ 2.4 billion from the EU budget, including € 28 million transferred from the Bulgarian envelope for CAP direct payments and € 0.5 billion of national funding). Currently, following the adoption of the Transitional Regulation, extending the programme by two additional years and the additional funding provided from the EU Recovery Instruments, the total planned public expenditure amounts to € 3.8 billion (€ 3.1 billion from EU budget).

Under the first objective of improved competitiveness and balanced development of the country's agri-food and forestry sectors, about 2 000 agriculture holdings and about 120 companies active in the forestry sector are expected to receive investment support. More than 4 000 small farmers will receive support to develop their farms and 3 705 young farmers will receive start up aid to launch their businesses. Under the second objective of protection and sustainable management of ecosystems, efficient use of natural resources and mitigation and adaptation to climate change, support for conversion and maintenance of organic farming will cover about 52 000 ha (out of which 23 000 ha will cover conversion to organic farming). Agri-environment-climate measures will be implemented on 113 000 ha and 60 000 ha in designated Natura 2000 areas will benefit from compensatory support. Under the third objective of socio-economic development of rural areas, more than 3 500 jobs will be created through diversification and development of small enterprises, and another 600 jobs will be created via the implementation of local development strategies. One third of the rural population will benefit from improved infrastructure.

Support for <u>Rural Development</u> is the 2nd Pillar of the <u>Common Agricultural Policy</u>, providing Member States with an envelope of EU funding to manage nationally or regionally under multi-annual, co-funded programmes. The new <u>RD Regulation</u> for the 2014-2020 period addresses six economic environmental and social priorities, and programmes contain clear targets setting out what is to be achieved. Moreover, in order to coordinate actions better and maximise synergies with the other European Structural & Investment Funds (<u>ESIF</u>), a <u>Partnership Agreement</u> has been agreed with each Member State highlighting its broad strategy for EU-funded structural investment.

This document provides a brief overview of how the challenges and opportunities faced by Bulgaria are addressed by the RDP. In the annex, a table indicates the priorities and focus areas each with their specific targets, and their allocated budget.

1. SITUATION AND KEY CHALLENGES

Data available at the time of drafting of the Programme show that Bulgaria covers an area of $110\ 900\ km^2$ of which $81\ \%$ is rural. Of the total area, $46.1\ \%$ is agricultural land while forests cover $37.4\ \%$. The total population is $7.28\ million$ – of which $39\ \%$ live in rural areas. In 2012, $58.8\ \%$ of the working-age population is employed, however the level of employment in rural areas is lower ($50.7\ \%$) and the areas are characterised by higher poverty and population decline compared to urban areas.

The agricultural sector contributes to 6 % of the country's Gross Value Added (GVA) and 18.3 % of the work places, while the food industry has a share of 3.8 % in the GVA and 3.4 % in the employment. The structure of agricultural holdings is polarised - although an average holding in Bulgaria utilises 12 ha of land, 91 % of the country's 370 500 agricultural holdings have less than 5 ha. The average economic size of an agricultural holding is \le 6 847. 23% of farms are in the range of \le 2 000 – \le 7 999 and they contribute to 24 % of the agricultural employment. Certain traditional agricultural sectors (such as fruit and vegetables, and livestock) are underperforming and experiencing structural difficulties. In addition to the need for technological modernisation, there is a necessity to promote short supply chains, restructuring of small farms, and generation renewal in agriculture in order to ensure stronger productivity growth and the creation of new jobs.

The Bulgarian ecological network Natura 2000 covers 34.4 % of the country's territory. 504 600 ha are classified as High Nature Value (HNV) areas. Nitrate Vulnerable Zones (NVZ) cover 34.5 % of the territory and 69 % of agricultural areas. However, land abandonment or intensification of agricultural production create risk for biodiversity, inefficient use of natural resources and negative impact on water and soil. As of 2012, only about 12 000 ha of the total agricultural land was certified for organic farming, but this figure is increasing every year. In 2011 the share of renewable energy in the total energy consumption was at 13.8 % (a 16 % target to be reached by 2020). 57% of Bulgarian forests are included in Natura 2000 and forest fires are a considerable risk, leading to loss of biodiversity and increased emissions.

Other challenges include depopulation and lower economic activity in rural areas, accompanied by poor quality of basic services for the rural population and outdated public infrastructure, social and cultural facilities.

2. How the Bulgarian RDP will address these challenges

In addressing these challenges, Bulgaria's RDP will fund actions under all six Rural Development priorities – with a particular emphasis on Competitiveness of agri sector and sustainable forestry as well as Social inclusion and local development in rural areas. A thematic sub-programme will be implemented to help the sustainable development of small farms. The focus of each priority is explained briefly below.

Knowledge transfer and innovation in agriculture, forestry and rural areas

Under this priority the RDP aims to support knowledge transfer and information actions, advisory services, farm management and farm relief services and co-operation. Around 4 800 people will be trained to increase the knowledge and skills of those employed in the agricultural and forestry sectors. Total number of co-operation actions will be 470 while 20 Operational Groups under the European Innovation Partnership will receive support.

Competitiveness of agri sector and sustainable forestry

The number of holdings to be supported for investments will be 2 000 (0.54%) while the number of beneficiaries receiving start up aid for development of small farms will be 4 060.

3 705 (1%) agricultural holdings will receive start-up aid for young farmers. Support is also foreseen for improving the economic performance of 120 companies active in the forestry sector.

Food chain organisation, including processing and marketing of agricultural products, animal welfare and risk management in agriculture

145 agricultural holdings (0.04%) will receive support for participating in quality schemes, local markets and short supply chains as well as in producer organisations. 330 operations will be supported linked to investments for production or marketing of agricultural products, as well as 40 producer groups involving 130 agricultural holdings.

Restoring, preserving and enhancing ecosystems related to agriculture and forestry

Support for conversion to organic farming will cover 23 000 ha and another 29 000 ha will be supported for maintenance of the organic farming activities. Agri-environment-climate submeasures will be implemented on 113 000 ha. 60 000 ha in designated Natura 2000 areas will benefit from compensatory support. Payments for areas with natural constraints are planned to cover 310 000 ha mountain areas and 220 000 ha of other areas facing significant natural constraints. As regards forestry, € 20 474 302 public funding is planned to be spent on forest-environmental and climate activities and forest conservation.

Resource efficiency and climate

Renewable energy production will be supported through investment of approximately \in 154 million, and another \in 419 million will be invested in improved energy efficiency in the agricultural sector and food processing industry. Investments in livestock management in view of reducing GHG and/or ammonia emissions (manure treatment) will affect more than 2 000 Livestock Units (0.17% of the total). Only 230 ha of agricultural and forest land will be under management contracts contributing to carbon sequestration and conservation.

Social inclusion and local development in rural areas

More than 3 500jobs will be created through diversification and development of small enterprises, and another 600 jobs via the implementation of LEADER local development strategies. Investments for diversification into non-agricultural activities will be provided to 630 enterprises. One third of the rural population will benefit from improved infrastructure. Support will be provided to 60 Local Action Groups under LEADER to implement local development strategies covering 23 % of the rural population. 1.64 % of the rural population will benefit from improved access to ICT (New Generation Access broadband infrastructure).

In 2020 and 2022 Bulgaria used the opportunities to provide additional support to farmers through the two exceptional measures – 21 and 22, proposed by the European Commission to address the challenges resulting from Covid-19 and the Russian aggression against Ukraine.

The **four biggest RDP measures** in budgetary terms (total public funding) are:

- o € 1 221 million allocated for Measure 4: Investments in physical assets
- € 718 million allocated for Measure 7: Basic services and village renewal in rural areas
- • 384 million allocated for Measure 13: Payments in areas facing natural or other specific constraints
- o € 282 million allocated for Measure 10: Agri-environment-climate
