ESIF-EFSI complementarities

- Legal bases of both ESIF and EFSI allow for contributions to support each other's objectives (**complementarity element**)
- Their **combination** is also possible: at **project** level, **financial instrument** level and through **investment platforms**
- Implementation process has to respect applicable rules (**CPR v EFSI Regulation**)
- **State aid rules** apply on a case-by-case basis

National Promotional Banks (NPBs)

- NPBs are entities mandated by Member States to carry out development or promotional activities
- NPBs hold a significant financing and advisory role in their constituencies – they "know" the local projects
- Member State participation under EFSI can be done through NPBs (8 MS already committed)
- NPBs may also receive EIB or other support
- NPBs' participation mode to be defined by EIB

Investment Platforms (IPs)

- IPs are ad hoc vehicles by which financing is channelled to projects
- IPs may be set up through various legal structures (SPVs, managed accounts, other arrangements)
- They can have a geographical, product, sectorial dimension
- IPs may also receive EIB or other support (Member State, private investors)
- IPs participation mode to be defined by EIB

Sectors where most potential can be achieved

EU Investment Offensive: Vice-President Katainen kicks off investment roadshow

"Our message is very clear: we are working to a very tight timeline to get new investment flowing into cash-starved business ventures, start-up firms, into infrastructure investments like transport or broadband and new schools and hospitals. We are taking to the road to build on the strong political support we have already received and to explain to the public and private sector how they can get involved."
