JANUARY - FEBRUARY 2021: EU27 AGRI-FOOD TRADE ON THE DOWNWARD TREND

During the first two months of 2021, EU27 agri-food trade (exports plus imports) reached a value of **€46.7 billion**; i.e. 9% less than in January-February 2020. EU27 exports decreased by 6% compared to the corresponding period in 2020, reaching **€28.5 billion**. EU27 imports attained **€18.2 billion**, 12.5% less than the same two months period in 2020. Looking at the developments from the perspective of preceding months, in February 2021 the value for EU27 exports rose by 11% comparing to the previous month, after having reported important falls (-15% in January and -5% in December), whereas the value of EU imports decreased by further 1% following the downward trend (-9% in January and -3% in December).

EU27 EXPORTS: MAJOR FALL WITH EU EXPORTS TO THE UK

On a year over year basis, for the period January-February 2021, the EU27 export values fell most to the **United Kingdom** (-€1 128 m, -17%), when compared with the same period in 2020. Significant decrease in the EU27 exports value affected the majority of agri-food products with meat preparations (-€92 m) and pig meat (-€84 m) leading. Looking at the developments from the perspective of preceding months, the value of EU27 exports to the UK were 17% higher in February than in January 2021 following a decrease of 32% and 9% in January 2021 and December 2020, respectively.

Similarly, for the period January-February 2021, the EU27 export values to the **United States** (-€287m, -8%) fell most despite a slight rise observed over the course of February. Decreasing exports have been primarily driven by important drops in sales of wine (-€141 m), beer (-€55 m), soft drinks and waters (-€47 m).

Other destinations, for which the value of EU27 agri-food exports fell most since January 2021 compared to the same period last year, remained to be **Russian Federation** (-€169 m, -13% - driven by decreased EU exports of oil seeds, maize, bulbs and live plants), Japan (-€141 m, -12%- pig meat, wine, spirits and liqueurs), Saudi Arabia (-€90 m, -12%) and Egypt (-€89 m, -25%).

On the other hand, for the period January-February 2021, the highest increases in the EU27 export values were recorded for **China** (+€529 m, +22%). This continued to be primarily driven by an increase in the EU exports of pig meat (+€239 m)¹ and coarse grains (+€124 m).

Nigeria (+€84 m, +48%) came second with EU exports boosted by increased trade, particularly in wheat. Other destinations, for which the value of EU agri-food exports increased most since January 2021, included **Norway** (+€75 m, +10%), Chile (+€57 m, +52%), Pakistan (+€37 m, +87%), and Ghana (+€37 m, +47%).

The main EU27 export destinations in the first two months of 2021 were the UK, the USA, China, Switzerland and Russia. Almost 50% of EU agri-food exports went to these five countries.

EU27 EXPORTS: DECREASE DRIVEN BY FALLS OF MAJORITY OF AGRI-FOOD PRODUCTS

Looking at product categories, significant reductions in EU exports in value terms were noted for the majority of them. However, biggest decline in value affected exports of product categories such as **wheat** (-€223 m, -17%), **infant food** (-€214 m, -15%), **spirits and liqueurs** (-€123 m, -11%), preparations of vegetables and fruit (-€119 m, -10%), fresh and chilled vegetables (-€114 m, -10%), and cheese (-€108 m, -11%).

On the other hand, the highest increases in export values (though minor) in January-February 2021 compared to the same months in 2020 were reported for **pig meat** (+€124m, +8%), **rapeseed and sunflower oils** (+€114 m, +24%), **pet food** (+€64 m, +8%), soups and sauces (+€31 m, +9%), and oilcakes (+€22 m, +22%).

The top EU agri-food export products in the period January-February 2021 included wine, pig meat, pasta and bakery products, chocolate and confectionary, and infant food. These products accounted for more than 26% of EU27 total agri-food exports.

¹ However, at a slower pace than recorded in previous months due to the Chinese sanitary restrictions on pig meat imports from some EU countries.

EU27 IMPORTS: SHARP FALL IN EU IMPORTS FROM THE UNITED KINGDOM

During the first two months of 2021, the value of EU27 agri-food imports has decreased by 12.5% compared to January-February 2020. This has been driven by a fall in the value of EU27 imports from the **United Kingdom** (-€1 376 m, -54%) and is related to the end of the transition period on 31 December 2020. While almost all agri-food product categories reported decreasing imports from the UK: spirits (-€128 m), chocolate and confectionary (-€74 m), and food preparations (-€62 m) experienced the biggest cuts in value, representing a reduction by approximately 50%.

Another important decrease was observed in the EU imports from the **United States** that went down by 10%, primarily driven by reduced purchases of tropical fruits (-€191 m). On the other hand, a notable increase in value of EU imports was reported for US soybeans (+€194 m). Other destinations, for which the value of EU27 agri-food imports fell most since January 2021 compared to the same period last year, included **Indonesia** (-€184 m, -22%- driven by reduced value of palm oil purchases), Ukraine (-€170 m, -14%- maize), and China (-€118 m, -12%- animal offal, fruit and vegetables fresh and frozen).

On the other hand, countries for which the EU27 import values increased most- taking into account the context of low growth, though- include **India** (+€49 m, +13%- soybean oilcakes), **Canada** (+€40 m, +8%- soybeans), Serbia (+€36m, +17%), Nigeria (+€34 m, +39%- cocoa beans), and Pakistan (+€31 m, +48%).

The top origins for EU agri-food imports in the first two months of 2021 included the USA, Brazil, the United Kingdom, Ukraine, and China. These countries accounted for almost 35% of EU27 agri-food imports in value terms.

EU27 IMPORTS: FALLING IMPORTS OF TROPICAL FRUIT AND SPIRITS

Looking at product categories, since the beginning of 2021, the highest decreases in import values continued to be reported for **tropical fruit** (-€411 m, -17%), **spirits and liqueurs** (-€194 m, -41%), **palm and palm kernel oil** (-€187 m, -19%), bovine meat (-€145 m, -45%), and coarse grains (-€142 m, -21%).

On the other hand, the EU27 imports value increased most for **oilcakes** (+€307 m, +34%), **soya beans** (+€126 m, +15%), **olive oil** (+€8 m, +13%), roasted coffee and tea (+€8 m, +3%), and ethanol (+€7 m, +5%).

The top EU agri-food import products in the first two months of 2021 included fruit (tropical and other than citrus), oilcakes, soybeans, unroasted coffee and tea. These products accounted for nearly 31% of EU27 agri-food imports.

EXPANDING SURPLUS IN EU27 AGRIFOOD TRADE

With exports and imports both decreasing, but with stronger falls on the import side, the agri-food trade surplus during the period January-February 2021 stood at **€10.3 billion**, an increase of 8% compared to the corresponding period in 2020. This net trade balance remained to be driven by high exports of wine, pig meat, pasta and pastry, chocolate and confectionary, infant food.
