

The delivery of ecosystem services through forests – *regulation and market-based mechanisms*

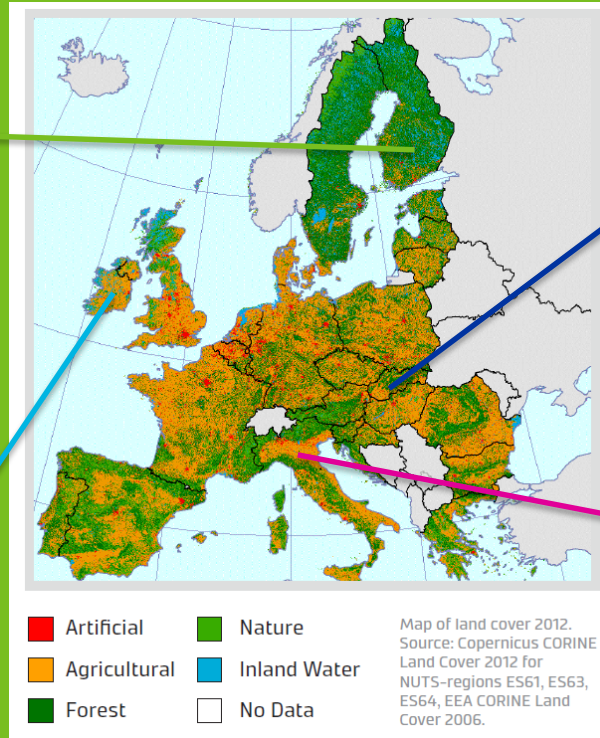

Tuula Packalen
Boreal Green Bioeconomy
Natural Resources Institute Finland

Forest information for added value from ecosystem services

Forest ecosystem services towards Factor F^n

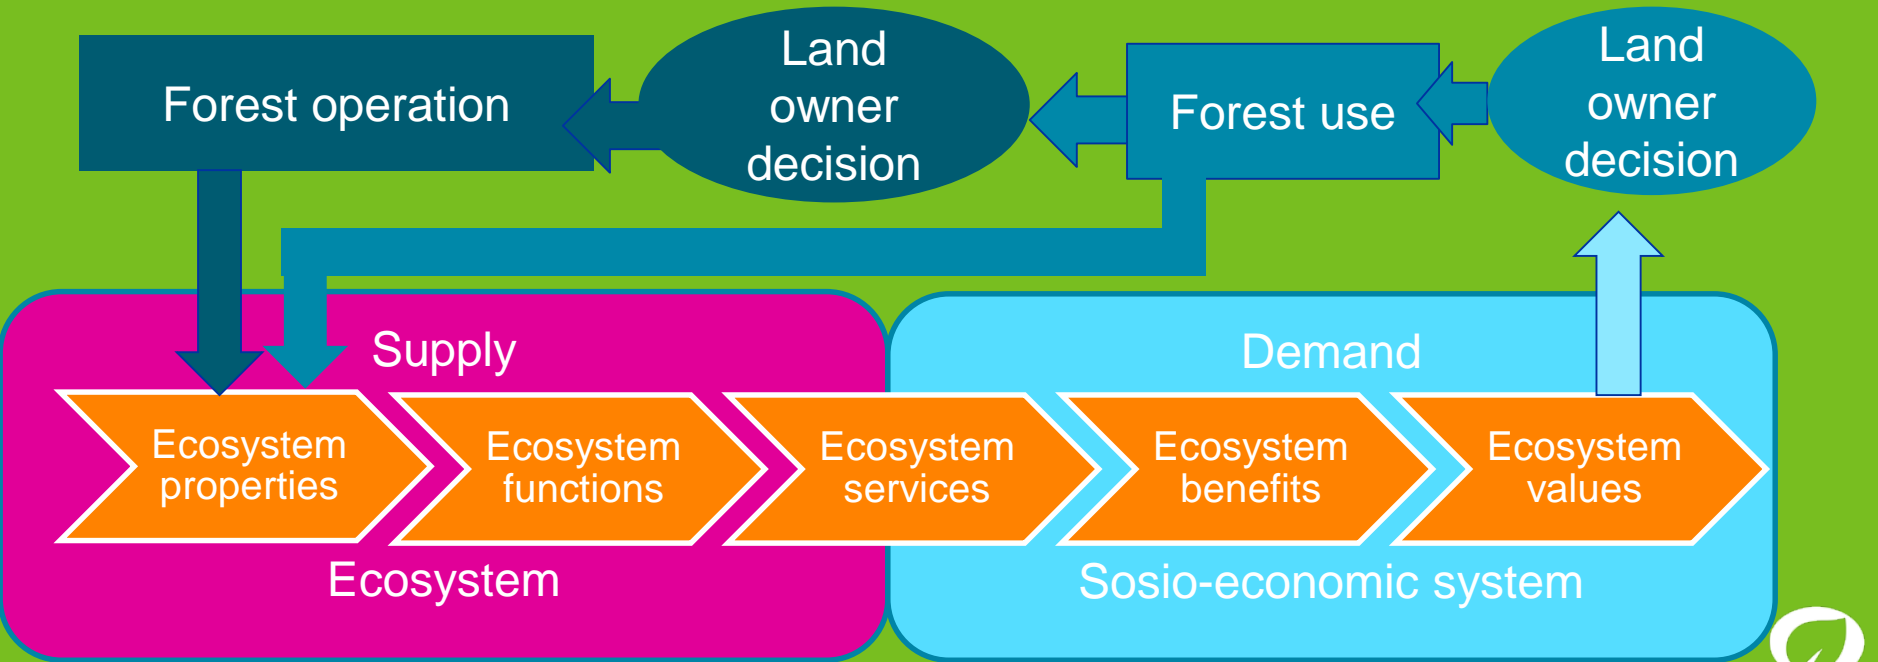

Delivery* of ecosystem services is site-specific

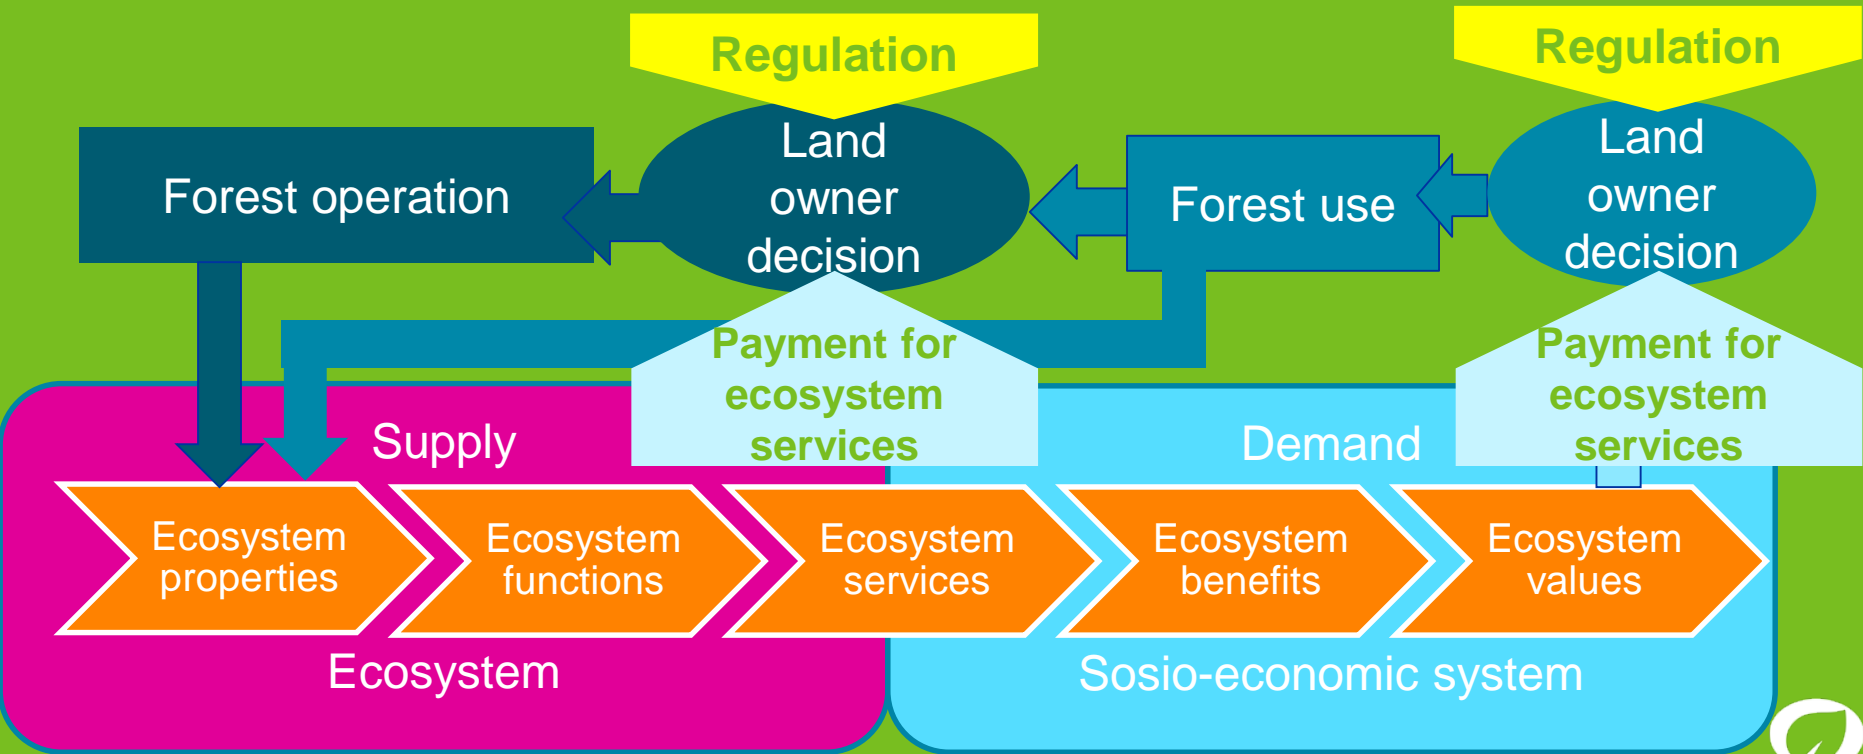

*Delivery = f (demand, supply)

Generic forest ecosystem service value-chain

Forest information is needed for added value*

*Added value = Price that the service is sold – costs of producing it.

DIABOLO

Distributed, Integrated and Harmonised
Forest Information for Bioeconomy Outlooks

DIABOLO POLICY BRIEF

Responding to European,
national and regional
challenges with harmonised
forest information
