Commission

Voluntary coupled support – Sectors mostly supported

**Notification of decisions taken by Member States by
1 August 2014**

The synthesis presented in this document reflects the content of Member States' notifications available to the Commission services to date. It is made available without prejudice to any finding in respect of their compliance with the regulatory framework.

**Informative note
30 July 2015**

1. Voluntary coupled support

Chapter 1 of Title IV of Regulation of the European Parliament and the Council (EU) No 1307/2013 provides for the possibility for Member States to use up to a maximum percentage of their annual national ceiling for direct payments to finance **voluntary coupled support** (VCS).

That support can only be granted to a list of sectors and productions¹, to the extent necessary to create an incentive **to maintain current levels of production** in sectors or regions where specific types of farming or specific agricultural sectors particularly important for economic, social or environmental reasons **undergo certain difficulties**. Coupled support shall take the form of an annual payment and shall be granted **within defined quantitative limits** in accordance with Article 52(6) of Regulation No 1307/2013. In this context, for each measure, a **quantitative limit (QL)** shall be determined by Member States in order to remain in compliance with the WTO 'blue box' criteria. The limit shall reflect the production levels in the targeted region or sector in at least one year in the period of 5 years that precedes the year of the decision about VCS.

In 2014, 27 Member States decided to apply VCS between 2015 and 2020. From the EUR 41-42 billion per year available to direct payments (EU-28), they earmarked **EUR 4.1-4.2 billion per year** to this purpose.

Member States may **revise their VCS decisions** by 1 August 2016 so that the intended changes, if any, shall apply as from 2017.

2. Beef and veal

By 1 August 2014, **24 Member States** have notified the Commission of their decision to grant a coupled support for the sector of beef and veal.

Based upon their decision, some **4.1% of the annual amount available for granting direct support in EU-28, i.e. 41% of the amounts earmarked to VCS**, will be available for the **beef and veal sector** from 2015.

Some **50 measures** were notified, targeting specific types of farming and/or regions in which the beef and veal sector and production undergoes difficulties. The table in annex provides an **overview of the notified measures**.

The quantitative limit at **EU level** for the beef and veal coupled support is **18.6 million bovine animals ("heads")**.

The **annual amount** available at EU level per year averages EUR **1,700 million** (or **91.3 euro per animal**) making the sector of beef and veal, the sector with the highest level of VCS support (ahead of the milk/milk product and sheep-/goatmeat sector).

3. Milk and milk products

By 1 August 2014, **19 Member States** have notified the Commission of their decision to grant coupled support for the sector of milk and milk products.

Based upon their decisions, some **2%** of the annual amount available for granting direct support in EU-28, i.e. 20% of the amounts earmarked to VCS, will be available **for the milk and milk products** sector from 2015.

¹ cereals, oilseeds, protein crops, grain legumes, flax, hemp, rice, nuts, starch potato, milk and milk products, seeds, sheepmeat and goatmeat, beef and veal, olive oil, silkworms, dried fodder, hops, sugar beet, cane and chicory, fruit and vegetables and short rotation coppice

Some **30 measures** were notified, targeting specific types of farming and/or regions in which the milk and milk product sector and production undergoes difficulties. The table in Annex provides an **overview of the notified measures**.

The quantitative limit at **EU level** for the milk and milk product sector is **12.3 million animals ("heads")**.

The annual amount available at EU level per year for the sector averages EUR 846 million (or **68.7 euro per animal**), making the sector the second most supported sector under VCS (after the beef and veal sector).

4. Sheep and goat

By 1 August 2014, **22 Member States** have notified the Commission of their decision to grant a coupled support for the production of sheepmeat and goatmeat.

Based upon their decision, about **1.2 % of the annual amount available for granting direct support in EU-28 i.e. 12% of the amounts earmarked to VCS**, will be available for the sheepmeat and goat meat sectors from 2015.

Some **40 measures** were notified by Member States, targeting specific types of farming and/or regions in the sheep and goatmeat sector that undergo difficulties. The table in annex provides an **overview of the notified measures**.

The quantitative limit at **EU level** for the sheep and goatmeat coupled support is approx. **41-42 million animals ("heads")**.

The **annual amount** available at EU level per year for the voluntary coupled support averages EUR **486 million** (i.e. approx. **12 euro per animal**), making the sector of sheepmeat and goatmeat the third most supported sector under VCS (after the beef and veal and the milk/milk product sector).

5. Protein crops

Article 53 (3) of Regulation No 1309/2013 provides for Member States the possibility to increase their annual national ceiling for VCS with up to 2 % if they decide to use **at least 2% of their annual national ceiling** set out in Annex II of that regulation to support the production of protein crops.

By 1 August 2014, **16 Member States** have notified the Commission of their decision to grant coupled support for the production of protein crops.

Based upon their decision, about **1 % of the annual amount available for granting direct support in EU-28, i.e. 10.6% of the amounts earmarked to VCS**, will be available for the production of protein crops from 2015.

Some **20 measures** were notified by the Member States, targeting specific types of farming and/or regions in which the protein crop sector and production undergoes difficulties. The table in annex provides an **overview of the notified measures**.

The quantitative limit at **EU level** for the protein crop coupled support is **4.3 million hectares**.

The **annual amount** available at EU level averages EUR **441 million** (or **102 euro per hectare**) making the sector of protein crops, the fourth most supported of the VCS supported sectors (after that of beef and veal, milk/milk product and sheep-/goatmeat).

6. Fruit and vegetables

By 1 August 2014, **19 Member States** have notified the Commission of their decision to grant a coupled support for the fruit and vegetable sector.

Based upon their decision, about **0.5 % of the annual amount available for granting direct support in EU-28, i.e. 5% of the amounts earmarked to VCS**, will be available for the production of fruit and vegetables from 2015.

Some **50 measures** were notified, targeting specific types of farming and/or regions in which the fruit and vegetables sector and production undergoes difficulties. The table in annex provides an **overview of the notified measures**.

The quantitative limit at **EU level** for the fruit and vegetables coupled support is **675,000 hectares**.

The **annual amount** available at EU level per year averages EUR **209 million** (or **309 euro per hectare**) making the sector of fruit and vegetables, the 5th most supported of the VCS supported sectors (after that of beef and veal, milk/milk product, sheep-/goatmeat and protein crops).

7. Sugar beet

By 1 August 2014, **10 Member States** have notified the Commission of their decision to grant coupled support for the production of sugar beet.

Based on their decision, about **0.4% of the annual amount available for granting direct support in the EU, i.e. 4.3% of the amounts earmarked to VCS**, will be available for the sugar beet sector from 2015.

11 measures were notified by Member States, targeting specific types of farming and/or regions in which the sugar beet sector and production undergoes difficulties. The table in annex provides an **overview of the notified measures**.

The quantitative limit at **EU level** for the sugar beet coupled support is **497,200 hectares**.

The **annual amount** available at EU level averages EUR **176 million** (or **354 euro per hectare**).

Reg. the table: all notified measures are taken into account in the table. For the sake of presentation and overview, where a Member State has notified more than one measure related to the same type of production (e.g. under regional measures), these have been regrouped and aggregated under the same entry line in the table.

For each notified measure, shall be determined: a quantitative limit (3. column), the total amount of aid allocated per year (5. column, broken down per year) and the (unitary) amount of aid per head/hectare per year (4. column of the table).

As regards the amounts per unit, at Member State level, where more than one measure has been notified, the "amount per unit" (4. column) is indicated with an interval, with the low and high end of the interval corresponding to the lowest and highest amount of aid per head/hectare of the notified measures. At EU level (i.e. 2nd line of the table), the "amount per unit" is the average amount of aid per head/hectare (per year) calculated on the basis of all the notified measures. Amounts per unit notified are indicative as provided for in Article 53(3) of Delegated Regulation (EU) No 639/2014.
