QUESTIONS TO THE EXPERTS OF THE WORKING GROUP ON OLIVES OF THE CIVIL DIALOGUE GROUP ON HORTICULTURE, OLIVES AND SPIRITS

Perspective of the olive oil sector for the new campaign 2022/23

1. For all participants

- How may consumption be affected with current olive oil prices?
- How are energy costs affecting your operations?
- What measures are you taking to improve your situation?

2. Representatives of farmers

- How do you see the future of traditional groves in a context of increasing pressure from climate change and other production systems (e.g. irrigated systems)?
- How have fertiliser costs affected the olive groves? Has the use of fertilisers been reduced? What is the estimated impact on yields? Over which time horizon?
- Labour shortages have been reported in some Greek & Portuguese producing regions. Has it also been the case in other regions?

3. Representatives of the industry

- How is the current situation on high energy prices affecting the industry?
- Do you anticipate specific problems in the refining industry?

4. Representatives of exporters/traders

- How do you see the evolution of international markets in the current context?
- What are your views on the current marketing year export flows in a context of a weak Euro?
- How have freight costs increased in the last years?
- Are there still bottlenecks in trade flows? For which flows?
- Are you expecting import restrictions from producing third countries to secure domestic availabilities? If yes, from which country(ies)?
- What are your estimated import flows this marketing year to compensate for low EU production? From which countries?

5. Representatives of consumers

- Did increased consumption of olive oil in households during confinement remain in households habits or did the shift towards a more healthy diet only temporarily benefited to olive oil consumption?

Perspective of the table olives sector for the new campaign 2022/23

1. Representatives of the industry

- How do you see the current situation with low production?
- How has energy costs development affected the table olives industry?

2. Representatives of exporters/traders

- How have freight costs increased in the last years?
- Are there still bottlenecks in trade flows? For which flows?
- What are your views on the current marketing year export flows in a context of weak Euro?
- What are your estimated import flows this marketing year to compensate for low EU production? From which countries?

3. Representatives of farmers

- Labour shortage has been reported in some Greek producing regions. Has it also been the case in your Member State?
