

Monitoring EU Agri-Food Trade: Development until May 2017

May 2017: Agri-food exports bounce back above average values

After a dip in April, the monthly value of EU agri-food exports rebounded in May 2017 and reached a value of EUR 11.5 billion, which is EUR 923 million (+9%) higher than in May 2016, and 15% higher than the 4-year average.

Highest increases in monthly export values (May 2016 compared to May 2017, EUR million) were recorded for the **US** (+122), **China** (+105), **Japan** (+88), **Hong Kong** (+79), **Russia** (+75) and **Korea** (+71). Monthly exports (EUR million) fell significantly to **Morocco** (-80) for a 2nd consecutive month, **Algeria** (-37) and **Egypt** (-33).

By sector, the highest export growth came in **wine**, (EUR +185 million), infant food, fatty

acids, and milk powders. **Wheat** exports dropped for a 3rd month (EUR -246 million), and exports of pork and other cereals also fell.

Monthly values for EU agri-food **imports** also increased in May 2017 compared to the year before (EUR +1 247 million; +13%). Imports in value terms from **US, Indonesia, Ukraine** and **Australia** increased most, while imports from **Brazil, Ghana** and **Cameroon** went down most. Major increases were seen in **oilseeds** and **palm oil** for the 2nd month, as well as for tropical fruit and unroasted coffee. Imports of **cocoa beans** decreased most in value terms.

Following an increase in exports and a higher increase in imports, the **net trade** balance in May 2017 continued to be positive at a total of **EUR +675 million**.

Exports to China, USA, Japan and Korea driving EU agri-food exports

For the 12-months period June 2016 to May 2017, EU agri-food exports reached a value of EUR 131.8 billion, corresponding to a sustained increase by 2.6% in value terms compared to the same period one year ago.

Major gains in annual values are being achieved in agri-food exports to **China** (EUR +683 million; +6%) and the **US** (EUR +678 million; +3%). Further annual increases are being recorded in agri-food exports to **Korea** (EUR +658 million) and to **Japan** (EUR +605 million). Increased exports to **Vietnam** (EUR +339 million) **Russia** (EUR +312 million, for non-banned products) and **Israel** (EUR +236 million) have also been taking place in the last twelve-month period.

Annual export values remain down for **North African** and **Middle East** destinations, such as **Egypt** (EUR -546 million; -27%), **Algeria** (EUR -415 million; -14%) and **Saudi Arabia** (EUR -358 million; -7%), though in May 2017 exports to the latter grew by EUR +26 million (+8%).

Despite a reduction in **pig meat** exports in the March-May 2017 period, export performance increased significantly over the last twelve months (EUR +794 million; +17%). Other product categories that are performing well include **wine** (EUR +758 million; +7%), **infant food** (EUR +757 million; +12%), **meat offal** (EUR +488 million; 19%) and **cigars and cigarettes** (EUR +382 million; +12%).

Wheat and other cereals exports experience the biggest drop on an annual base (EUR -1.0 billion; -18% and EUR 776 million, -30%, respectively). Only two other categories, namely **raw hides and skins** (EUR -259 million; -13%) and **eggs and honey** (EUR 131 million; -17%) recorded notable losses in export values over the last 12 months, though **wool and silk** registered a high percentage fall (-22%).

EU agri-food imports also increasing

Agri-food imports from third countries in the 12-months period June 2016 to May 2017 accounted for over EUR 115 billion, i.e. an increase by 1.5% compared to the same period one year ago. Nevertheless, driven by the strong export performance, the **export surplus** for the 12-months period amounts to **EUR 16.8 billion** (+11%).

Main origins for EU agri-food imports over the past 12 months were **Brazil** (EUR 12.0 billion), **United States** (EUR 11.3 billion), **Argentina** (EUR 5.9 billion) and China (EUR 5.2 billion), followed by Switzerland, Indonesia, Turkey and Ukraine around EUR 4 billion each.

On the year-on-year basis, the value of agri-food imports from top four importers went down. Imports from **Brazil** by EUR -641 million or -5% and from the **United States** decreased by EUR -256 million, (-2%). For **Argentina** the decrease is smaller at -1%. For other key partners, there were significant percentage reductions, such as from **Turkey** (-9%), **New Zealand** (-8%), **Chile** (-4%) and **Malaysia** (-3%).

On the other hand, **Indonesia** increased most significantly (EUR +615 million, +15%). Over the 12 months period, EU import values for agri-food products also went up for **Vietnam** (EUR +335 million; +15%).

Looking at imports per product category, the highest increase in values over the last 12 months was for **cocoa beans** (EUR +612 million; +15%). Imports of **oilseeds other than soybean** (EUR +559 million; +16%), **palm oil** (EUR +509 million; +9%) and **vegetables** (EUR +369 million; +8%) also increased significantly.

On the other hand, import values decreased in particular for **wheat** (EUR -373 million; -24%), **raw tobacco** (EUR -318 million; -12%) and **oilcakes** (EUR -303 million; -4%).

Focus on: EU agri-food trade with Japan

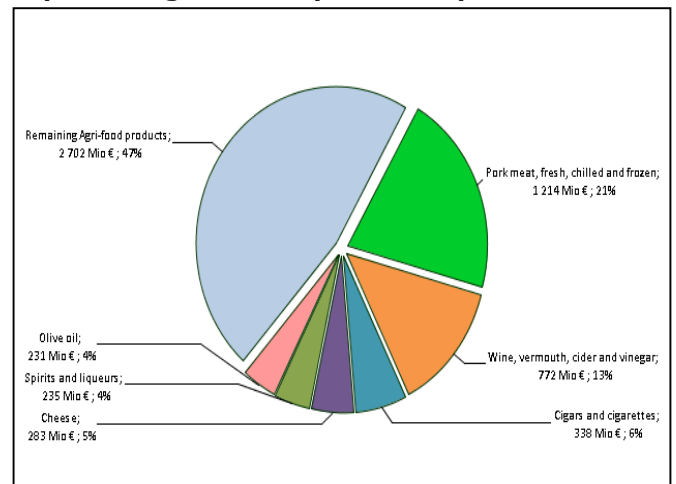

On 6 July 2017, the European Union and Japan reached an agreement in principle on the main elements of an EU-Japan Economic Partnership Agreement. The EU-Japan trade deal will be the most successful agreement ever achieved in agriculture, providing EU exporters better opportunities. It represents the biggest concession Japan has ever granted on agriculture to any trade partner, meaning that the EU is likely to become the most significant partner for Japan for agri-trade.

The EU is currently a net-exporter of agri-food products to Japan, with a surplus of EUR 5.46 billion in 2016. Japan is the EU's 4th biggest export destination with EUR 5.77 billion of agri-food exports. Furthermore, exports to Japan have increased steadily over the past years (+3.9%/year). While EU imports from Japan are small (EUR 311 million per year, 0.3% of EU total agri-food trade), they have been rising since 2006 at a rate of 9.4% per year.

The main EU export products to Japan are pork meat (21% of EU agri-food exports to Japan), wines (13%), cigars/cigarettes (6%), cheese (5%) and spirits (4%).

Imports from Japan mainly consist of soups and sauces (17%), spirits (12%) and fatty acids and waxes (9%).
