

Organic imports in the EU

A first analysis-Year 2018

Contents

1. Organic imports in volumes
2. Organic imports: an estimated value
3. An analysis per country
4. An analysis per product
5. Relative importance of certain organic products on the total

The aim of this brief is to describe the main features of the imports of organic products into the EU from third countries both in terms of products and origin.

Since October 2017, the Certificate of Inspection CoI that must accompany every consignment entering in the EU, has become electronic. Besides the advantages to enhance traceability of the organic consignments coming from third countries, the system has allowed to start to collect valuable data and create a data base on the imports of organic products. The collected data are only available in volumes, while values have been estimated.

1. Organic imports in volume

Imports of commodities dominate the scene

In 2018, the EU imported a total of 3,3 million tonnes of organic agri-food produce, of which 57% was in the form of commodities and 35% as other primary products.

Figure 1 – Share of the total agri-food imports volumes by class.

Source: Traces

Figure 1 presents the shares of imports for 6 classes of organic agri-food products, according to the DG AGRI "Monitoring Agri-trade Policy" classification, (see box 1) while table 1 shows the absolute values in tonnes of the imports.

Table 1 – Volume of the organic agri-food imports in to the EU (by product class).

PRODUCT CLASS	TONNES	SHARE ON THE TOTAL ORGANIC AGRICULTURE
Commodities	1.860.761	57,1
Other primary	1.143.935	35,1
Processed products incl. Wine	196.618	6,0
Food preparations	34.108	1,0
Non edible	14.687	0,5
NON AGRI	6.557	0,2
Total	3.256.666	100,0

Source: Traces

Box 1: "Monitoring Agri-trade Policy". It is a monthly sheet published by DG AGRI to monitor the EU trade of agri-food products. There, products are divided into 6 classes: "commodities", "other primary", "processed", "food preparations", "beverage" and "non-edible products". "Commodities" includes, among others: cereals, vegetable oils and oilseeds, sugars, milk powders and butter, unroasted coffee and cocoa. "Other primary" includes: meat products, F&V, milk yoghurt and honey. "Processed" includes: cheese, meat preparations, wine and fruit juices. "Food preparations" includes: infant food, confectionary

and pasta. "Beverages" includes: beers, spirits and soft drinks, while "non-edible" covers: plants and essential oils. Moreover, in its scope, the organic regulation covers also products of the fishery sector, which are reported under the label "non-agri".

Looking within the product classes, "tropical fruit, fresh or dried, nuts and spices" is the first imported category (24%) followed by cereals that at aggregate level represent 22% of the total imports, oil cakes (11%), fruit and vegetables (9%) and oilseeds (6%).

Figure 2 – Products by aggregated product category.

Table 2 shows, more in details, that imports of "Tropical fruit, fresh or dried, nuts and spices" represent the single biggest item, totalling 793.597 tonnes or 24.4% of total imports. Four products categories, classified as commodities, constitute the most important product imports, in volume terms, into the EU: "Oilcakes" (352.043 tonnes, 10.8%); "Cereals, other than wheat and rice" (255.764 tonnes, 7.8%); "Wheat" (243.797 tonnes, 7.5%); and "Rice" (216.017 tonnes, 6.6%).

Table 2 – Volume of the organic agri-food imports in to the EU (by product category).

Rank	PRODUCTS	Tonnes	%
1	Tropical fruit, fresh or dried, nuts and spices	793.597	24,4
2	Oilcakes	352.043	10,8
3	Cereals, other than wheat and rice	255.764	7,8
4	Wheat	243.797	7,5
5	Rice	216.017	6,6
6	Oilseeds, other than soyabeans	192.927	5,9
7	Beet and cane sugar	166.328	5,1
8	Vegetables, fresh, chilled and dried	148.108	4,5
9	Fruit, fresh or dried, excl. citrus & tropical fruit	147.114	4,5
10	other	742.837	22,8
	Total	3.258.532	100

Source: Traces

The EU sources its organic agri-food imports widely, with a total of 115 countries registering exports to the EU. In volume terms, China is the biggest supplier of organic agri-food products to the EU, with 415 243 tonnes of produce, that is, 12.7% of the total (see Table 3). Ecuador, the Dominican Republic, Ukraine and Turkey each have an 8% share of the market.

Table 3 – Volume of the organic agri-food imports in to the EU (by country of origin).

Rank	COUNTRY	Tonnes	%
1	China	415.243	12,7
2	Ecuador	278.475	8,5
3	Dominican Rep.	274.599	8,4
4	Ukraine	266.741	8,2
5	Turkey	264.218	8,1
6	Peru	207.274	6,4
7	US*	170.753	5,2
8	UAE	127.806	3,9
9	India*	125.807	3,9
10	Brazil	72.353	2,2
	<i>Other</i>	1.055.262	32,4
	Total	3.258.532	100

* Equivalent third countries (see box 2)

Source: Traces

Box 2: Imports from Third Countries. The EU imports organic products from third countries under two different regimes: 1) equivalent third countries (US, Canada, Japan, South Korea, India, Argentina, Australia, New Zealand, Costa Rica, Chile, Israel, Switzerland and Tunisia) which have a production and control system recognised as equivalent, for certain product category, by the EU, listed in Annex III of Regulation 1235/2008 and 2) the control body system: private bodies authorised by the European Commission and listed in annex IV of the same Regulation that can operate in third countries and certify operators for the purpose of exports. As from 2021 with the new Regulation 2018/848 the CB's will have to apply the compliance to EU rules

Figure 3 – Imports from the first 10 third countries in percentage on the total volume.

Source: Traces. In green equivalent countries.

2. Organic imports: an estimated value

In the absence of primary data on unit values for organic imports (see box 3), estimates have been made using prices for total trade volumes of the same 6 classes and 68 agri-food product categories, presented in Tables 1 and 2. Adjusting for unit value allows an appreciation of which are the most valuable product categories, and thus a comparison of product types imports both within the organic sector.

Being and adjusted value, figures are not presented in absolute terms, but rather as a share of the total organic imports.

Table 4 – Share of the value of the organic agri-food imports in to the EU per product class.

PRODUCT CLASS	SHARE ON THE TOTAL ORGANIC AGRIFOOD IMPORTS
Other primary products	40,4
Commodities	40,1
Processed products including Wine	12,3
Food preparations	3,5
Non-edible products	2,3
Non-agricultural products	1,3
Beverages	0,1

Source: Traces

Owing to the greater unit value of other primary products compared to commodities, these two product classes have similar shares in the total value of imports, at 40.4% and 40.1% respectively.

Figure 3 – Share of the total agri-food imports values by class.

Source: Traces

Turning to the product categories (Table 5), "Tropical fruit, fresh or dried, nuts and spices", again, represents the single biggest item, 27.2% of imports.

Table 5 – Share of the value of the imports of organic agri-food imports per product, calculations based on adjusted values.

Rank	PRODUCTS	%
1	Tropical fruit, fresh or dried, nuts and spices	27,2
2	Unroasted coffee, tea in bulk & maté	9,0
3	Fruit, fresh or dried, excl. citrus & tropical fruit	7,3
4	Rice	5,5
5	Cocoa beans	4,6
6	Oilseeds, other than soyabean	3,9
7	Oilcakes	3,6
8	Fruit juices	3,4
9	Olive oil	3,2
10	Other	32,4
	Total	100

developed according to the Organic regulation in force. It ensures the traceability of the products intended to be imported into the EU as organic, as well as the exchange of information between the different actors of the supply chain. The system provides an automatic built-in check for the CN codes of the products, by allowing only the import of products falling in the scope of the EU organic legislation

Along with tropical fruit in the "Other primary products class", "fresh or dried, excluding citrus and tropical fruit" was the second category (7.1% of the total). Within the product class of "commodities", there product categories stand out: "Unroasted coffee, tea in bulk and mate" (9%) along with rice (5%) and cocoa beans (4.6%).

In terms of value, Peru and China represent *ex-aequo* the first suppliers of the EU, with a share of 7.8% each. Then come Turkey and Dominican Republic (6.8%)

Table 6 – Share of the value of the imports of organic agri-food imports per country, calculations based on adjusted values.

Rank	PRODUCTS	%
1	Peru	7,8
2	China	7,8
3	Turkey	6,8
4	Dominican Republic	6,8
5	Ecuador	6,5
6	United States	5,6
7	Mexico	4,3
8	Tunisia	4,1
9	India	3,8
10	other	46,6
	Total	100

3. An analysis per country

The top ten...

The imports of the first ten importing countries have then been analysed.

China: almost $\frac{3}{4}$ of the imports from China in volume consist of "oilcakes". The remaining imports are represented mainly by: "soybeans" (5.7%) and "oilseeds other than soya" (5%).

Table 7 – Volume of the organic agri-food imports into the EU from China.

Rank	PRODUCTS	Tonnes	%
1	Oilcakes	310.535	74,8
2	Soyabeans	23.479	5,7
3	Oilseeds, other than soyabeans	20.864	5,0
4	Tropical fruit, fresh or dried, nuts and spices	11.371	2,7
5	Vegetables, fresh, chilled and dried	10.671	2,6
6	Flours and other products of the milling industry	9.418	2,3
7	Fruit juices	5.778	1,4
8	Eggs and honey	4.093	1,0
9	Unroasted coffee, tea in bulk & maté	4.030	1,0
10	Other	15.004	3,6
	Total	415.243	100

Source: Traces

Concerning Ecuador more than 90% of the imported products is "Tropical fruit, fresh or dried, nuts and spices", and likely bananas.

Table 8 – Volume of the organic agri-food imports into the EU from Ecuador.

Rank	PRODUCTS	Tonnes	%
1	Tropical fruit, fresh or dried, nuts and spices	252.015	90,5
2	Preparations of vegetables, fruit or nuts	10.473	3,8
3	Palm & palm kernel oils	6.656	2,4
4	Fish	2.446	0,9
5	Cocoa beans	1.982	0,7
6	Vegetables, fresh, chilled and dried	1.856	0,7
7	Beet and cane sugar	1.462	0,5
8	Unroasted coffee, tea in bulk & maté	406	0,1
9	Cereals, other than wheat and rice	364	0,1
10	Other	816	0,3
	Total	278.475	100

Source: Traces

The remaining 10% is divided mainly between "Preparation of vegetables, fruits or nuts" (3.8%) and "Palm and palm kernel oils" (2.4%). Fishery products, cocoa beans, vegetables and others represent, each, less than 1% of the imports in volume.

Dominican Republic supplies the EU almost exclusively with tropical products: 90% of the imports are "Tropical fruit, fresh or dried, nuts and spices" and almost 10% is represented by "Cocoa beans".

Table 9 – Volume of the organic agri-food imports into the EU from Dominican Republic

Rank	PRODUCTS	Tonnes	%
1	Tropical fruit, fresh or dried, nuts and spices	246.341	89,7
2	Cocoa beans	27.062	9,9

Ukraine is the first supplier of the EU of organic products on the European continent. 70% of the total imports consist mainly of cereals, broken down in "Cereals, other than wheat and rice" (42,8%) and "Wheat" (28,5%). Oilseeds represent more than 15% in total, broken down into "Oilseeds, other than soyabeans" (10.8%), and soyabeans (5%)

Table 10 – Volume of the organic agri-food imports into the EU from Ukraine

Rank	PRODUCTS	Tonnes	%
1	Cereals, other than wheat and rice	114.201	42,8
2	Wheat	75.971	28,5
3	Oilseeds, other than soyabeans	28.773	10,8
4	Soyabeans	13.269	5,0
5	Fruit, fresh or dried, excl. citrus & tropical fruit	12.955	4,9
6	Fruit juices	5.947	2,2
7	Flours and other products of the milling industry	3.922	1,5
8	Vegetables, fresh, chilled and dried	3.552	1,3

....and two more.

In table 6, Mexico and Tunisia are also ranked, as top 10 exporters to the EU, as 7 and 8 respectively, in terms of estimated values. For this reason they are also reported in this analysis per volume.

Mexico represents the 11th country as supplier of organic agri-food products to the EU in volumes.

Fruit juices is the first category (almost 27%), followed by 'sugar, other than beet and cane", (22.5%) and "Tropical fruit, fresh or dried, nuts and spices" (18%).

Table 17 – Volume of the organic agri-food imports in to the EU from Mexico

Rank	PRODUCTS	Tonnes	%
1	Fruit juices	19.095	26,9
2	Sugar, other than beet & cane	16.018	22,5

The category "Tropical fruit, fresh or dried, nuts and spices" represents the second biggest chunk of exported products (17.1%). The other products represent a limited share on the total.

4. An analysis per product

Table 5 reports the share of the adjusted value of imports of organic agri-food. The first five categories reported in that table were put in relation to their country of origin and the relative volume is also reported.

The EU imports organic "Tropical fruit, fresh or dried, nuts and spices" mainly from Ecuador (31.8%), followed by Dominican Republic (31%) and Peru (17.4%). The remaining countries represent a substantially lower share compared to the first three.

Table 19 – Origin of "Tropical fruit, fresh or dried, nuts and spices" per country of origin

5. Relative importance of certain organic products on the total

In order to assess the importance of the organic agri-food imports, in the total of the agri-food imports into the EU, an analysis was made of the share of organic produce on the total, by product category. The top-10 agri-food product categories are presented in figure 5 below.

"Olive oil" represents the most important product category, with 20.7% of total imports being organic.

"Flours and other products of the milling industry" have a share of 15.2%; "Beet and cane sugar" 11.0%; and "Rice" 10.9 %. While "Tropical fruit, fresh or dried, nuts and spices" was the most important organic product category in absolute terms, organic imports only occupy 9.0% of total EU agri-food imports for such products

Figure 5 – The top-10 agri-food product categories with the highest share on the total imports.

Source: Traces and Comext

These data suggest that, there is an important demand for specific organic products, such as organic olive oil, flours, sugar, rice and tropical fruit.
