

## Quality Assessment for Public Consultation Synthesis Reports

According to the Commission **Better Regulation Guidelines and toolbox** the Quality Assessment (QA) by the Inter Service Group judges the external contractor's report and its overall process. It is the final "sign off" by the ISG of the contractor's work and includes a judgement on whether key aspects of the work conducted meet the required standards and provides any related comments.

If the evaluation is selected for review by the Regulatory Scrutiny Board, this QA and minutes of the last ISG meeting will form part of the package submitted to the RSB.

In compliance with the above, this documents provides a **Quality Assessment checklist** to be completed **for all interim and ex-post evaluations**, in order to:

- give a structured feedback to the Evaluator on the draft report, and
- support and justify the approval of the final version of the report.
- Provide stakeholders and citizens with an overview of the strengths and weaknesses of the evaluation.

The assessment criteria included should be applied also with reference to the specific Terms of Reference for the evaluation to be assessed and specific agreements made between the evaluation Steering Group and the Evaluator during the execution of the contract.

The checklist can be quickly filled out by ticking boxes, but becomes most useful when also including comments in the open fields.
