

December 2021

Factsheet on 2014-2022 Rural Development Programme for Region Campania

The Rural Development Programme (RDP) for Region Campania was formally adopted by the European Commission on 20 November 2015, outlining Campania priorities for using the € 2.4 billion of public money that is available for the 9-year period from 2014-2022 (almost € 1.47 billion from the EU budget, of which 94.3 million from the NextGenerationEU recovery instrument 1.38 million EAFRD and € 900 million of national co-funding and around 40 million of additional national financing).

The RDP for Campania focuses on restoring, preserving and enhancing ecosystems as well as on improving the competitiveness of agriculture. Around 64 000 hectares will be protected through environmental land management contracts targeted to specific biodiversity and water objectives and preventing soil erosion. In addition, over 44 000 hectares of farmland will receive support to either convert to or maintain organic farming. In order to improve the competitiveness and sustainability of the farm sector, nearly 12 000 places in training courses will be created to promote innovation, co-operation and more sustainable farming practices. Furthermore, the activation of a guarantee fund will promote the investment rate for farmers due to a specific financial coverage. Nearly 1 600 agricultural holdings (including young farmers) will benefit from support to improve their economic performance, and restructure and modernise their farms. Around 1 900 young farmers will be granted business start-up aid. Finally, local development and economic diversification projects will deliver around 300 new jobs and 6.06% of the rural population will get access to new or improved ICT and broadband infrastructure. In addition, the region is supporting beneficiaries hit by the consequences of COVID 19 sanitary emergency with a dedicated measure as well as through the funds stemming from the 100% co-financed recovery instrument NextGenerationEU.

Support for [Rural Development](#) is the 2nd Pillar of the [Common Agricultural Policy](#), providing Member States with an envelope of EU funding to manage nationally or regionally under multi-annual, co-funded programmes. In total, 118 programmes are foreseen in all 28 Member States¹. The new [RD Regulation](#) for the period 2014-2020 addresses six economic, environmental and social priorities, and programmes contain clear targets setting out what is to be achieved. Moreover, in order to coordinate actions better and maximise synergies with the other European Structural & Investment Funds ([ESIF](#)), a [Partnership Agreement](#) has been agreed with each Member State highlighting its broad strategy for EU-funded structural investment.

This document provides a brief overview of how the challenges and opportunities Region Campania is facing are addressed by the RDP. In the annex, a table indicates the priorities and focus areas each with their specific targets, and their allocated budgets.

¹ The UK left the Union on 31st January 2020; in accordance with the Withdrawal Agreement support under Rural Development continues to apply in the UK during the 2014-2020 programming period.

1. SITUATION AND KEY CHALLENGES

In Italy, rural development is implemented through 22 separate RDPs – one at national level and 21 regional RDPs. In addition, the National Rural Network Programme provides the funding for the networking of rural development actors in Italy.

Campania is categorised as a "less developed" region. The region covers an area of around 13 590 km², of which 91.5% is rural. Of the total area, utilised agricultural land (UAA) covers 40% and forest land 28%. The total population is near 6 million – of which 5% lives in rural areas. Campania is one of the most densely populated regions in Europe (424.6 inhabitants per km²). The number of livestock units is around 450 000.

Campania has a low employment rate of 43.7% (below the national average), while unemployment is at an extremely high level corresponding to 19.3% and the youth unemployment rate accounts for 48.2%.

The regional GDP is steadily decreasing and the economic results are worse than the overall national average.

About two thirds of the regional territory are characterized by low levels of infrastructure and/or difficulties in the use of basic services. Broadband and information and communication technologies (ICT) are marked by insufficient network coverage and the degree of Internet use in households is below the national average (44.2% versus 54.8%).

In general, the agricultural sector in Campania faces structural changes with many small-size farms disappearing as they are absorbed by medium-size farms, which subsequently become bigger.

Campania's rural areas are challenged by a persistent loss of business activity, migration of labour force, and demographic changes. Ageing of the agricultural population and the low number of young farmers are also issues of concern for rural development in Campania.

Campania also faces environmental challenges, such as an increased and serious pressure of intensive agriculture and breeding on natural resources. However, the Farmland Bird Indicator has increased by nearly 11% between 2000 and 2012, meaning that there are 11% more birds today compared to year 2000. Soil erosion is higher than the Italian average, and it is mainly due to intense laminar erosion. Finally, organic farming is still underdeveloped and covers only 2.6% of the total utilised agricultural land (5% Italian average), despite the good potential in this sector.

Moreover, Campania is characterised by an outstanding naturalistic heritage: the NATURA 2000 network (124 sites) covers 27.5% of the total surface area and more than half of the total forest area. The High Nature Value farmland areas represent 40.6 % of the UAA.

2. HOW THE RDP OF REGION CAMPANIA WILL ADDRESS THESE CHALLENGES

In addressing these challenges, the RDP for Campania will fund action under six Rural Development priorities – with a particular emphasis on restoring, preserving and enhancing ecosystems related to agriculture and forestry as well as competitiveness of agri sector and sustainable forestry. The focus of each priority is explained briefly below.

Knowledge transfer and innovation in agriculture, forestry and rural areas

Knowledge transfer system (workshops, coaching, demonstration activities, information actions and company visits) will be enhanced through specific training addressed to the

farmers with regard notably climate change, sustainable agriculture and food quality. Particular attention will be paid to the training of new entrepreneurs, especially young farmers. An important element is innovation which is facilitated via co-operation, and information and knowledge transfer between the agri-food sector, researchers and other stakeholders. 125 different co-operation projects (developing pilot projects) will be financed, there will be support for 56 Operational Groups under the European Innovation Partnership and the region will deliver around 11 700 places in training courses.

Competitiveness of agri sector and sustainable forestry

Support will be targeted at process and product innovation in farms, in agro-industrial and forestry holdings. The objective is to improve output and product quality, combined with a reduction of production costs. Similarly important are the improvement in the productive powers of labour, equipment modernisation (including ICT systems) and diversification of production. Another important strategy choice is to promote the creation and development of non-agricultural activities in order to create new income opportunities.

Moreover, the progressive ageing of the workforce makes necessary to accelerate the entry of young skilled people into the agricultural sector to ensure the future of farming, innovation, and improving productivity and competitiveness.

Almost 1 600 investment projects will be supported for investments in restructuring or modernisation, plus 1 900 young farmers will be granted business start-up aid for implementing their business plans. Around 11 700 places in training courses are foreseen for these topics.

In addition, the "Cooperation" measure will fund further projects in social agriculture and forestry. The forest sector will also be supported through investments in forestry technologies and in processing of forest products.

Food chain organisation, including processing and marketing of agricultural products, animal welfare and risk management in agriculture

Support is granted for new participants in quality schemes by groups of farmers, and for information and promotion activities. The objective is to improve logistic and commercial channels, and to raise consumer awareness about quality products on the market. Farmers are also encouraged to participate in cooperation projects with a view to develop short supply chains with focus on innovative projects and those that contribute to the reduction of impacts on the environment and climate.

The region estimates that around 700 farmers will receive support to participate in quality schemes and short supply chain. The RDP also provides support for actions to prevent and repair damage caused by natural disasters, in synergy with specific actions under the national RDP.

Moreover, 95.3 million EUR are invested in projects related to animal welfare.

Restoring, preserving and enhancing ecosystems related to agriculture and forestry

Under this priority, the RDP aims to support environmental-friendly farm practices going beyond the obligations imposed by environmental legislation and the greening of the CAP. In particular, nearly 20 % of the agricultural land will be under management contracts supporting biodiversity, water and soil management.

Campania's RDP will also support environmental investments in agriculture and forestry as well as actions supporting biodiversity in Natura 2000 areas and other areas of high natural value. Other important actions concern the support of organic farming (about 16 200 hectares will receive support to convert to organic farming and another 27 800 ha to

maintain) and the payments to farmers in mountain areas to avoid the risk of land abandonment in the mountains of Campania.

Resource efficiency and climate

The actions proposed for climate change mitigation and adaptation refer to promoting the rational use of water resources (inter alia, through modernisation of equipment and conversion of irrigation systems, technologies and distribution systems), the development of bioenergy as well as the use of agricultural and agro-industrial by-products.

Another important area of action is the reduction of greenhouse gas, particulate matter (PM 10) and ammonia emissions from agro-industrial activities, and increasing carbon sequestration through forestry actions. Additionally, the co-operation measure supports enhanced sustainability through the European Innovation Partnership and through co-operation for climate change adaptation and mitigation.

Investments in agricultural holdings with environmental purposes will receive € 39.5 million of public support. This includes 667 projects that will receive support targeting more efficient irrigation systems. In other words, a total of more than 1 500 ha of irrigated land will be switching to more efficient irrigation systems. € 8 million will be invested in renewable energy production. Finally, 187 hectares of agricultural land will be under management contracts to foster carbon sequestration/conservation.

Social inclusion and local development in rural areas

The main actions of the RDP Campania focus on fostering local development in rural areas by creating basic services (first of all, concerning ultra-broadband infrastructure EUR 20.5 million will be allocated in order to cover 6% more of the rural population) and support for local development strategies (LEADER), which includes the involvement of 1.6 million people in rural areas and the creation of about 130 additional jobs.

The four ***biggest RDP measures*** in budgetary terms (total public funding) are:

- € 791 million allocated to measure 4 (Investments in physical assets)
- € 412 million allocated to measure 13 (Payments to area facing natural or other specific constraints)
- € 231 million allocated to measure 10 (Agri-environment-climate)
- € 196 million allocated to measure 6 (Farm and business development)

Annex 1: Indicative public support for the Rural Development Programme in Region Campania

Target	Measure	€ Total public	%
Priority1: Knowledge transfer and innovation in agriculture, forestry and rural areas¹			
1A: Fostering innovation, cooperation, knowledge base 2.50% of RDP expenditure	01 knowledge		
	02 advisory		
	16 cooperation		
1B: Strengthening links (with research etc.) 125 cooperation projects	16 cooperation		
1C: Training 11 707 participants trained	01 knowledge		
Priority 2: Farm viability, competitiveness and sustainable forest management		750 659 586	31.09
2A: Economic performance, restructuring & modernisation 1.16% of holdings with RDP support	01 knowledge	2 229 750	0.09%
	02 advisory	2 890 000	0.12
	04 investments	361 144 322	14.96
	06 farm / business development	77 329 216	3.20
